FIELD NOTES
OF THE

DEPENDENT RESURVEY

OF A

PORTION OF THE

SUBDIVISIONAL LINES,

TOWNSHIP 26 NORTH, RANGE 31 EAST,

Of the Gila and Salt River Meridian,
In the State of Arizona

EXECUTED BY

Leonard R. Sandoval, Cadastral Surveyor

Under Special Instructions dated and approved May 23, 1986, which provided for the surveys included under Group Number 680 and Assignment Instructions dated July 31, 1996.

Survey Commenced September 10, 1996
Survey Completed October 31, 1996

CHAINS

The following field notes describe the dependent resurvey of a portion of the subdivisional lines, Township 26 North, Range 31 East, of the Gila and Salt River Meridian, Arizona.

The boundaries and subdivision of section 7 were surveyed by Paul L. Reeves in 1978. A portion of the subdivisional lines were dependently resurveyed, and the survey of the subdivisional lines of the township was completed by Richard S. Kaiser and James L. Werdel in 1984.

Responding to a memorandum from the Director, Navajo Area Office, Bureau of Indian Affairs, dated July 8, 1996, requesting remonumentation of certain corners that were destroyed on the Navajo Indian Reservation in the state of Arizona, the Bureau of Land Management has undertaken the dependent resurvey described in the following field notes.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, the Special Instructions dated May 23, 1986, and the Assignment Instructions dated July 31, 1996, for Group No. 680, Arizona.

Preliminary to the resurvey the lines of the previous surveys were retraced and search was made for certain corners and other calls of the record. Identified corners were remonumented in their original positions. The retracement data were thoroughly verified and only the true line field notes are given herein.

The directions of all lines were determined by direct hour angle observations on the sun, and refer to the true meridian. Distances and angles were measured with a Lietz SET4B, a total station instrument.

The mean magnetic declination is 12° E.

CERTIFICATE OF SURVEY

I, Leonard R. Sandoval, Cadastral Surveyor, HEREBY CERTIFY upon honor that, in pursuance of Special Instructions bearing date of the 23rd day of May, 1986, and Assignment Instructions bearing date of the 31st day of July, 1996, I have dependently resurveyed a portion of the subdivisional lines, Township 26 North, Range 31 East, of the Gila and Salt River Meridian, in the state of Arizona, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, assignment instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, 1973, and in specific manner described in the foregoing field notes.
