Re: Oro Blanco/OB Claims, Santa Cruz County, Arizona

Dear Sir or Madam:

I enclose a copy of the "2011-2012 Affidavit and Notice of Intent to Hold Mining Claims" for the Oro Blanco/OB claim groups. The Affidavit was previously recorded in Santa Cruz County on July 17, 2012 as Document No. 2012-05649. I also enclose our Check No. 11760 in the amount of \$240.00 for your filing fee (24 claims at \$10.00 per claim).

Minefinders (USA) Inc. is making this filing under protest in order to address the "scrivener's error" in the 2011 budget enactment relating to lode and placer claims. In the event that the Congressional problem is later corrected, I request that this payment be refunded.

Thank you for your attention.

RE: Certified letter mailed by Ralph Griffin.

The piece off mail in question was indeed mailed on the 30th of December. We are in an isolated area so our mail dispatch time is at 10:45 A. M., so when we accept any pieces of accountable mail, such as certified, the receipt will be marked on the day that the post office accepted it, even though it will not leave our office until the next day. Such was the case with Mr. Griffins letter. He came into the office after 11:00 A. M., so the receipt says one date and the letter actually reads another date.

I hope that this will help clarify this matter, but if you have any questions please feel free to call me.

Respectfully,

Linda Moody

The work consisted of:

Geologic mapping and sampling at one inch equals 500 feet, one inch equals 200 feet, and one inch equals 50 feet.

Geologic samples were taken of all interesting outcrops located. Existing roads were regraded and drill pads constructed. Road regrading and construction was performed on the White Gold 1, 2, 3, 8, 9, 11, 16, 20, 23 and 24 claims for the benifit of the entire claim block. Mapping and sampling was conducted on the entire claim group.

Said work was performed between January 1, 1990 and August 10, 1990. A total of more than TWENTY SIX THOUSAND DULLARS (\$26,000) was expended in performing the work, or equivalent value added. The work was performed by:

Mapping, sampling, project direction:
Andrew G. Markos, Exploration Manager
Zephyr Resources, Inc.

Sparks, Nevada 89431

Road regrading, drill pad and road construction: Sierrita Mining and Ranching HC 70 Box 4260 Sahuarita, Arizona 85629-9311

The findings of the above work are as follows:

New areas of potentially economic gold mineralization were located in silicified zones of the Uro Blanco conglomerate in areas previously untested by drilling. Strong propylitic alteration suurounding the Sidewinder quartz monzonite on the property also provided encouragment for future exploration programs. A number of geochemical anomalies were obtained from samples of outcrops from these areas. The geologic mapping increased understanding of the controls influencing the occurrence of the mineralization and will be used to guide future programs. The road reconstruction and drillpad construction was completed to advance the project for future exploration and development activities.

The work was performed under the direction of Andrew G. Markos, Exploration Manager, Zephyr Resources, Inc. whose qualifications to supervise such work include a MS in Geology and 14 years experience in the mining industry.
