EXHIBIT A
SUMMARY REPORT
GEOLOGIC MAPPING AND FIELD EVALUATIONS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during 1991 consisted of detailed geologic mapping and field evaluations of sites which had been previously identified through airborne geophysics. Mapping was conducted to determine each site's potential to contain a deep-seated collapse feature bearing economic mineralization. Regional mapping also was performed around the sites to provide a geologic framework in which to interpret the site-specific mapping results. Data obtained from the mapping program has served to define those sites of strongest potential, and will serve to prioritize further work within the claim block.

The work was conducted under the supervision of J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation. All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

Dated and signed this 13th day of December, 1991.

SUMMARY REPORT - OTTO CLAIMS

RECEIVED
P.L.M.
ARIZONA STATE OFFICE
DEC 23 2 18 PM '91

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during August of 1991 consisted of a detailed geophysical survey and attendant analyses performed by K. O. Sweet, Consultant, as directed by Mark B. Mathisen, Senior Geophysicist for Energy Fuels, Ltd. and J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation.

The cost of the geophysical study exceeds \$2,650. The basic findings of this study are as follows:

Summary: A TDEM survey covering a portion of the claim block was performed to characterize the signature of a mineralized breccia pipe in the survey area. Analyses of the survey results with respect to drilling results and previous surveys indicates that the survey should be expanded over a large area to fully reveal the near surface geology.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

SUMMARY REPORT
GEOLOGIC MAPPING AND FIELD EVALUATIONS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during 1991 consisted of detailed geologic mapping and field evaluations of sites which had been previously identified through airborne geophysics. Mapping was conducted to determine each site's potential to contain a deep-seated collapse feature bearing economic mineralization. Regional mapping also was performed around the sites to provide a geologic framework in which to interpret the site-specific mapping results. Data obtained from the mapping program has served to define those sites of strongest potential, and will serve to prioritize further work within the claim block.

The work was conducted under the supervision of J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation. All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

SUMMARY REPORT - OTTO, GNAT & GENE CLAIMS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described below.

The work performed during the week of August 6 through 10, 1990 consisted of detailed geological surveys performed by Pathfinder staff geologists under the supervision M.W. Coleman, Senior Geologist for Pathfinder Mines Corporation, a University of New Mexico geology graduate with 18 years mineral exploration experience.

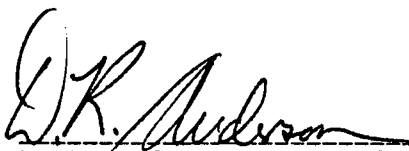

The cost of the geological studies exceeds \$1,900. Assessment work was satisfied by a continuation of Pathfinder's detailed airborne geophysical program: data acquisition, ground truth evaluation stages, including field examination, mapping and sampling of areas indicated as anomalous by multi-frequency resistivity surveys. A target site inspection was conducted with the managing federal agency.

This work is dedicated primarily to Otto claim numbers 1, 3, 9, 10, 13-19, 21, 23, 25, 26, 46, 47, 95, and 97. The basic findings of this study are as follows:

Review and geologic evaluation of airborne geophysical EM data for the Otto and Gnat claim blocks resulted in further definition of our breccia pipe targets. These studies enhance knowledge of the mineral controls in the area thereby providing and encouraging a more informed base for future exploration and development for a mineralized breccia pipe.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 255 Glendale Ave Suite 26, Sparks, Nevada 89431.

Dated and signed this 18th day of December, 1990.

SUMMARY REPORT - OTTO, GNAT & SAGE CLAIMS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during April 1989 consisted of detailed geological surveys performed by C.D. Hubbard, Senior Geologist for Pathfinder Mines Corporation; airborne EM geophysics performed by Dighem, Inc.; and evaluation and interpretations made by Joseph Roux, geophysicist for COGEMA.

The cost of the geological and geophysical studies together with physical work performed on the ground exceeds \$35,600. The basic findings of this study are as follows:

Review and geologic evaluation of airborne geophysical EM data for the Otto and Sage claim blocks resulted in identification of possible new breccia pipe targets. Interpretation of the Otto EM data indicates contrasting resistivity anomalies that suggests thick accumulation of Moenkopi redbeds overlying a deepseated breccia pipe.

These studies enhance knowledge of the mineral controls in the area thereby providing and encouraging a more informed base for future exploration and development for a mineralized breccia pipe.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 N. 1300 West, Suite 5, St. George, Utah 84770.

SUMMARY REPORT - BESS CLAIMS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work, performed during June and July 1988 consisted of detailed geological surveys performed by C.D. Hubbard, Senior Geologist for Pathfinder Mines Corporation.

The cost of the geochemical studied exceeds \$900. The basic findings of this study are as follows:

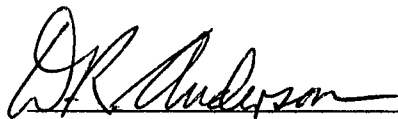

Detailed evaluation of deep drill holes at the Bess structure notes uncertain stratigraphic variations for upper Coconino levels in at least one or more drill holes.

Additional airphoto and ground studies also suggest the Bess structure may be the result of deep seated stoping processes as noted on neutron density logs.

These studies enhance knowledge of the mineral controls in the area thereby providing and encouraging a more informed base for future exploration and development for a mineralized breccia pipe.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 N. 1300 West, Suite 5, St. George, Utah 84770.

EXHIBIT "A"

SUMMARY REPORT - BESS CLAIMS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work, performed during November 1986 consisted of detailed geological surveys performed by C.D. Hubbard, Senior Geologist for Pathfinder Mines Corporation.

The cost of the geochemical studied exceeds \$900. The basic findings of this study are as follows:

The thick Moenkopi accumulation, plus the brecciated Kaibab and Toroweap are favorable characteristics of the collapse cone for a breccia pipe.

These studies enhance knowledge of the mineral controls in the area thereby providing and encouraging a more informed base for future exploration and development for a mineralized breccia pipe.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 N. 1300 West, Suite 5, St. George, Utah 84770.

SUMMARY REPORT - SHEEP CLAIMS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during June, 1987 consisted of detailed geological surveys performed by C.D. Hubbard, Senior Geologist for Pathfinder Mines Corporation.

The cost of the geological studies together with physical work performed on the ground exceeds \$7,400. The basic findings of this study are as follows:

The Sheep III structure is located in Sec.19-T31N-R1E. Trenching pits were centrally placed in the area where the structure had been drilled and corresponded to previous geophysical work. Less than 4 ft. of brown topsoil with some Kaibab cobbles/boulders as float were present on top of flat lying, light gray-tan limestone. A thin zone (4-6") of caliche separated the topsoil and the Kaibab Limestone.

These studies enhance knowledge of the mineral controls in the area thereby providing and encouraging a more informed base for future exploration and development for a mineralized breccia pipe.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 N. 1300 West, Suite 5, St. George, Utah 84770.
