Therefore, the name on the claims listed on attached Schedules 1 and 2 need to be changed from Denison Arizona Strip LLC to EFR Arizona Strip LLC. To reflect the name change, enclosed please find an approved Amendment to Articles of Organization filed with and accepted by the Arizona Corporation Commission.

Finally, the address for EFR Arizona Strip LLC has changed, please send future correspondence to:

EFR Arizona Strip LLC

SUMMARY REPORT
GEOLOGIC MAPPING AND FIELD EVALUATIONS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during 1991 consisted of detailed geologic mapping and field evaluations of sites which had been previously identified through airborne geophysics. Mapping was conducted to determine each site's potential to contain a deep-seated collapse feature bearing economic mineralization. Regional mapping also was performed around the sites to provide a geologic framework in which to interpret the site-specific mapping results. Data obtained from the mapping program has served to define those sites of strongest potential, and will serve to prioritize further work within the claim block.

The work was conducted under the supervision of J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation. All technical work and results are in the posession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

Dated and signed this 13th day of December, 1991.

SUMMARY REPORT - OTTO CLAIMS

RECEIVED
BLM
ARIZONA STATE OFFICE
DEC 23 2 19 PM '91

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during August of 1991 consisted of a detailed geophysical survey and attendant analyses performed by K. O. Sweet, Consultant, as directed by Mark B. Mathisen, Senior Geophysicist for Energy Fuels, Ltd. and J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation.

The cost of the geophysical study exceeds $2,650. The basic findings of this study are as follows:

Summary: A TDEM survey covering a portion of the claim block was performed to characterize the signature of a mineralized breccia pipe in the survey area. Analyses of the survey results with respect to drilling results and previous surveys indicates that the survey should be expanded over a large area to fully reveal the near surface geology.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

SUMMARY REPORT
GEOLOGIC MAPPING AND FIELD EVALUATIONS

RECEIVED
JUL 2 1992
PHOENIX, ARIZONA
BLM AZ STATE OFFICE

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during 1991 consisted of detailed geologic mapping and field evaluations of sites which had been previously identified through airborne geophysics. Mapping was conducted to determine each site's potential to contain a deep-seated collapse feature bearing economic mineralization. Regional mapping also was performed around the sites to provide a geologic framework in which to interpret the site-specific mapping results. Data obtained from the mapping program has served to define those sites of strongest potential, and will serve to prioritize further work within the claim block.

The work was conducted under the supervision of J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation. All technical work and results are in the posession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

Dated and signed this 13th day of December, 1991.

SUMMARY REPORT - OTTO, GNAT & GENE CLAIMS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described below.

The work performed during the week of August 6 through 10, 1990 consisted of detailed geological surveys performed by Pathfinder staff geologists under the supervision M.W. Coleman, Senior Geologist for Pathfinder Mines Corporation, a University of New Mexico geology graduate with 18 years mineral exploration experience.

The cost of the geological studies exceeds $1,900. Assessment work was satisfied by a continuation of Pathfinder's detailed airborne geophysical program: data acquisition, ground truth evaluation stages, including feild examination, mapping and sampling of areas indicated as anomolous by multi-frequency resistivity surveys. A target site inspection was conducted with the managing federal agency.

This work is dedicated primarily to Otto claim numbers 1, 3, 9, 10, 13-19, 21, 23, 25, 26, 46, 47, 95, and 97. The basic findings of this study are as follows:

> Review and geologic evaluation of airborne geophysical EM data for the Otto and Gnat claim blocks resulted in further definition of our breccia pipe targets. These studies enhance knowledge of the mineral controls in the area thereby providing and encouraging a more informed base for future exploration and development for a mineralized breccia pipe.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 255 Glendale Ave Suite 26, Sparks, Nevada 89431.

Dated and signed this 18th day of December, 1990.
