Dear Sir/Madam:

Re: Name Change from Denison Arizona Strip LLC to EFR Arizona Strip LLC

On June 29, 2012, Energy Fuels Inc. acquired all of Denison Mines Corp.'s U.S. mining assets and operations, through the acquisition of the shares of all of Denison's U.S. subsidiaries, including Denison Arizona Strip LLC.

On July 26, 2012 Energy Fuels Inc. changed the name of Denison Arizona Strip LLC to EFR Arizona Strip LLC. Therefore, the name on the claims listed on attached Schedules 1 and 2 need to be changed from Denison Arizona Strip LLC to EFR Arizona Strip LLC. It is important to note that the entity has not changed, just the name of the entity. To reflect the name change, enclosed please find an approved Amendment to Articles of Organization filed with and accepted by the Arizona Corporation Commission.

Finally, the address for EFR Arizona Strip LLC has changed, please send future correspondence to:

EFR Arizona Strip LLC
Attn: Meredith Goble
225 Union Blvd., Ste. 600
Lakewood, Colorado 80228

Please make a note of these changes in your records, and feel free to contact me directly at mgoble@energyfuels.com or 303.389.4155 with any future correspondence regarding this matter.

Yours very truly,

ENERGY FUELS RESOURCES (USA) INC.

MINING CLAIMS DECLARED ABANDONED

The Federal Land Policy and Management Act (FLPMA) of 1976, 43 U.S.C. 1744, and the implementing regulations in 43 CFR 3833.2, require an annual filing for all mining claims recorded with the Bureau of Land Management (BLM). FLPMA provides that failure to file evidence of annual assessment work or a notice of intention to hold by December 30 of each year shall be deemed conclusively to constitute an abandonment of the claim and it is void by operation of law. The constitutionality of Section 314 of FLPMA was upheld on April 1, 1985, by the United States Supreme Court in United States v. Locke et al., 471 U.S. 84, 129 (1985).

The BLM records do not show receipt of either an affidavit of annual assessment work performed or a notice of intention to hold for the claim(s) listed on the enclosed sheet(s) for the 1992 assessment year.

If you did timely file an affidavit or notice of intention to hold with the BLM during 1992, please furnish a copy which shows receipt by the BLM Arizona State Office, (dated and time stamped) during 1992.

Your proof must show the required document was timely filed with the BLM during 1992, otherwise it will not be accepted. The evidence must be received in this office no later than 30 days from receipt of this decision. If the proof is not furnished during this 30-day period, the claim(s) will be removed from our records as abandoned and void.

MOONSHINE SPRING PROJECT
1991 - 1992 ASSESSMENT WORK

The following is a summary of work performed for the benefit of the unpatented MOO claims by Pathfinder/ASP Joint Venture as part of a business venture with EXXON Minerals. The exploration project is located in Mohave County Arizona.

I Resource Evaluation

A) Geologic interpretation of existing drill hole data

Drill hole electric logs were correlated and assembled into cross sections. Correlation parameters included not only electric log parameters but also analysis of core and cuttings from the holes.

B) Calculation of radiometric results of logging

Analog and digital radiometric drill hole data were interpreted and equivalent grades were calculated. Mineralization intercepts were assembled and assigned areas of influence based upon available drill hole density and geologic parameters.

C) Spatial distribution of equilibrium conditions

Evaluation of equilibrium conditions of within the potential ore body was based upon chemical and radiometric analysis of drill hole samples. Spatial variations in equilibrium conditions was dependent on evaluation of both paleo and current hydrologic variables.

D) Resource calculation

A series of resource calculations were performed under a variety of assumptions.

E) Results of the study

A decision to continue exploration efforts on the property was supported by the results of this work. Areas needing additional drilling were identified and specific hydrologic evaluation tests were designed.

Areas of known mineralization and significant geologic potential were identified and each claim was evaluated based upon these criteria.

F) Cost of the evaluation

Labor, and consumable costs for the study were in excess of $10,000.00.

II Field Work

A) Field activities

Geologic interpretation of field relations (sketch mapping) focused on a search for small scale faults which not appear at normal geologic mapping scale. Physiographic features which might impede drill site construction were identified. Brunton and tape surveys of drill holes revealed a significant survey error.

B) Results and cost of activities

No faults with offsets sufficient to disrupt present ground water flow were identified.

Exploration drilling of some areas will require significant site preparation costs. Near term plans are not affected.

Resurvey of some drill holes will be required.

Cost of field activities exceeds $2000.00.

III Supervision

All of the above work was performed under the supervision of John T. Cottrell, District Geologist, Pathfinder Mines Corporation. Mr. Cottrell received an B.S. in Geology from Michigan State University in 1972 and has been continuously employed in the mining industry since 1978.

SUMMARY REPORT
GEOLOGIC MAPPING AND FIELD EVALUATIONS

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during 1991 consisted of detailed geologic mapping and field evaluations of sites which had been previously identified through airborne geophysics. Mapping was conducted to determine each site's potential to contain a deep-seated collapse feature bearing economic mineralization. Regional mapping also was performed around the sites to provide a geologic framework in which to interpret the site-specific mapping results. Data obtained from the mapping program has served to define those sites of strongest potential, and will serve to prioritize further work within the claim block.

The work was conducted under the supervision of J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation. All technical work and results are in the posession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

Dated and signed this 13th day of December, 1991.

SUMMARY REPORT - OTTO CLAIMS

RECEIVED
BLM
ARIZONA STATE OFFICE
DEC 23 2 16 PM '91

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during August of 1991 consisted of a detailed geophysical survey and attendant analyses performed by K. O. Sweet, Consultant, as directed by Mark B. Mathisen, Senior Geophysicist for Energy Fuels, Ltd. and J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation.

The cost of the geophysical study exceeds $2,650. The basic findings of this study are as follows:

Summary: A TDEM survey covering a portion of the claim block was performed to characterize the signature of a mineralized breccia pipe in the survey area. Analyses of the survey results with respect to drilling results and previous surveys indicates that the survey should be expanded over a large area to fully reveal the near surface geology.

All technical work and results are in the possession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

SUMMARY REPORT
GEOLOGIC MAPPING AND FIELD EVALUATIONS

RECEIVED
BLM, AZ STATE OFFICE

This report is filed in compliance with the requirements of Title 30 United States Code 28-1 for mining claims described in the attached Affidavit of Annual Assessment Work.

The work performed during 1991 consisted of detailed geologic mapping and field evaluations of sites which had been previously identified through airborne geophysics. Mapping was conducted to determine each site's potential to contain a deep-seated collapse feature bearing economic mineralization. Regional mapping also was performed around the sites to provide a geologic framework in which to interpret the site-specific mapping results. Data obtained from the mapping program has served to define those sites of strongest potential, and will serve to prioritize further work within the claim block.

The work was conducted under the supervision of J. T. Cottrell, Senior Geologist for Pathfinder Mines Corporation. All technical work and results are in the posession of and are considered to be the exclusive property of the owner of the subject mining claims, PATHFINDER MINES CORPORATION, 935 North 1300 West, Suite 5, St. George, Utah 84770.

Dated and signed this 13th day of December, 1991.
