Acknowledgement of Documentation Submitted Amendment Required

You received a Notice to inform you that the mining claims listed above are association placer mining claims that are over 20 acres in size and are currently held by a smaller number of claimants than is permitted by law, unless there was a discovery of a valuable mineral deposit prior to the date of transfer. The Notice required that you provide documentation to support a discovery of a valuable mineral deposit or amend the claims to comply with the 20-acre per claimant requirement.

In response to the Notice, on December 8, 2015, you submitted documentation you believed showed such a discovery. The information was reviewed by a mineral examiner. It was determined the information submitted was incomplete and you were provided an opportunity to submit additional information. On March 15, 2016, you submitted additional information as requested. This Notice acknowledges that we received both sets of documentation you submitted. After examination by a mineral examiner, our office has made the determination that you will not be required to reduce the claim acreage on AMC310989, AMC310991, and AMC310990 at this time. Our decision is based solely on the documentation you submitted and even though you will not be required to reduce the claim acreage at this time, no factual determination has been made by this office that a valid discovery has been made. That determination cannot be made without a complete mineral validity examination, and our office will not be pursuing that type of examination at this time.

Regarding AMC310987, AMC310988, AMC310992, AMC311330, AMC311331, and AMC311332, it has been determined the documentation is insufficient and does not include the information requested (see enclosed comment from mineral examiner). Therefore, the Bureau of Land Management (BLM) is requiring that the acreage of the above listed mining claims be reduced to comply with the 20-acre per claimant requirement. Acreage amended from these claims could then be relocated as new claims.

There is a \$10 BLM processing fee for each amendment. We must receive the amendments within 30 days of receipt of this notice. If the amendments are not received within the 30 day timeframe the mining claims will be declared forfeited and void.

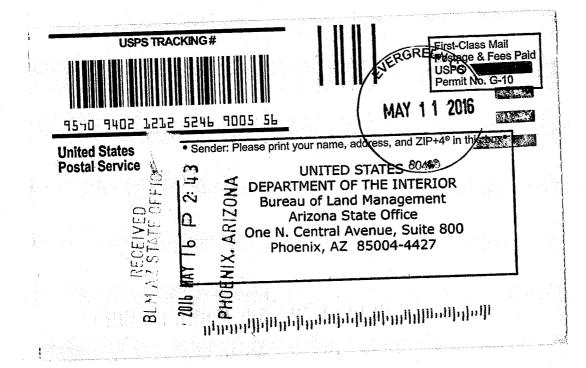

If additional information is required, please contact RéAnn Myers at 602-417-9413. Please include your AMC serial number(s) on all correspondence.

The Notice required that you provide documentation to support a discovery of a valuable mineral deposit or amend the claims to comply with the 20-acre per claimant requirement.

In response to the Notice, on December 8, 2015, you submitted documentation you believed showed such a discovery. The information was reviewed by a mineral examiner. It was determined the information submitted was incomplete and you were provided an opportunity to submit additional information. On March 15, 2016, you submitted additional information as requested. This Notice acknowledges that we received both sets of documentation you submitted. After examination by a mineral examiner, our office has made the determination that you will not be required to reduce the claim acreage on AMC310989, AMC310991, and AMC310990 at this time. Our decision is based solely on the documentation you submitted and even though you will not be required to reduce the claim acreage at this time, no factual determination has been made by this office that a valid discovery has been made. That determination cannot be made without a complete mineral validity examination, and our office will not be pursuing that type of examination at this time.

Regarding AMC310987, AMC310988, AMC310992, AMC311330, AMC311331, and AMC311332, it has been determined the documentation is insufficient and does not include the information requested (see enclosed comment from mineral examiner). Therefore, the Bureau of Land Management (BLM) is requiring that the acreage of the above listed mining claims be reduced to comply with the 20-acre per claimant requirement. Acreage amended from these claims could then be relocated as new claims.

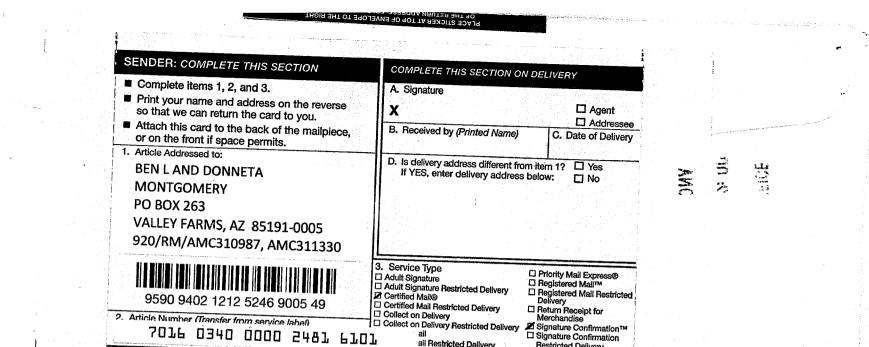

There is a \$10 BLM processing fee for each amendment. We must receive the amendments within 30 days of receipt of this notice. If the amendments are not received within the 30 day timeframe the mining claims will be declared forfeited and void.

If additional information is required, please contact RéAnn Myers at 602-417-9413. Please include your AMC serial number(s) on all correspondence.

Association Placer Mining Claims Documentation or Amendments Required

The mining claims listed above are association placer mining claims that are over 20 acres in size. The claims were originally located with the required number of locators to meet the 20-acre per locator requirement. However, the claims are now held by a smaller group of claimants than originally located them and are therefore not in compliance with the legal requirements.

By law, each individual claimant is allowed to hold a maximum of 20 acres per claim. A corporation is considered to be a single entity that is allowed to hold a maximum of 20 acres per claim. In accordance with 43 CFR 3833.33 you may transfer, sell, or otherwise convey an association placer mining claim at any time to an equal or greater number of mining claimants. If you want to transfer an association placer claim to an individual or an association that is smaller in number than the association that located the claim you (a) must have discovered a valuable mineral deposit before the transfer; or (b) upon notice from the Bureau of Land Management (BLM), you must reduce the acreage of the claim, if necessary, so that you meet the 20-acre per locator limit.

On November 10, 2015, BLM sent you a notice requesting that you show compliance with 43 CFR 3833.33 by providing either documentation of a discovery of a valuable mineral deposit for each of the four claims as listed prior to the claims being transferred from the original locators to yourself, or reducing the claim acreage to 120 acres per claim as allowed by law.

On December 8, 2015, information was provided to this office with the intent to show that a valuable mineral deposit existed on the claims prior to transfer.

The BLM determined that the information was incomplete to show that a valuable mineral deposit existed prior to the transfer of the claims to you.

The BLM is hereby giving you an opportunity to provide more information to prove discovery prior to the date whereby the following claims were transferred to a smaller number of claimants:

Claim Name	BLM Claim Number	Location
GEM NO 1	AMC310987	T19S R16E, Section 18, NW ¹ / ₄

As stated in the enclosed Certified Review Mineral Examiner memo, the following information or additional information is needed:

- Map or maps showing the location of the mining claims and the location of related references, i.e., East and West Chispa, etc.
- Map or maps showing the location of samples, in relationship to the mining claims, which were taking in 1990 and 1997, and the findings resulting from each sample (gold quantity).
- The chart found on page 71 of the information provided is not completely legible and it is not clear as to the relationship of the data to the subject claims either in time or location.
- A showing of how the sampling resulted in a determination of an "ore reserve" of 10 million yards for the GEM claims.

Without this information we cannot determine if the claims are being properly held by a smaller number of claimants than required to meet the one claimant per each 20 acres of the claim requirement. Therefore, we are requiring that the above listed information be submitted to this office for review by a mineral examiner.

This required information must be dated **prior** to the date of transfer. If you do not have this information, then you must amend the claims listed above, reducing the acreage to 20 acres per claimant as allowed by law.

We must receive either this additional documentation supporting a discovery of a valuable mineral deposit, or amendments within 30 days of your receipt of this notice. If the required documentation or the amendments are not received within the 30-day timeframe the mining claims will be declared forfeited and void. If amendments are filed, there is a \$10 BLM processing fee for each amendment. The amendments must also be filed with the county.

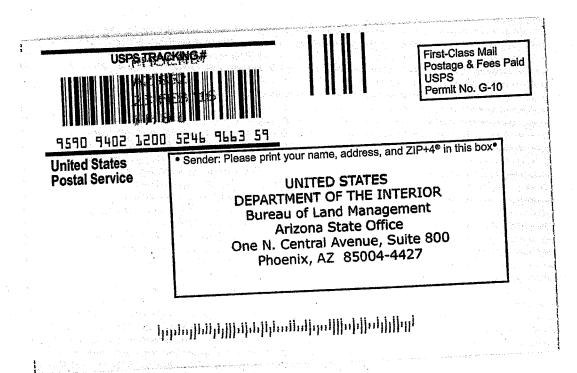

If additional information is required, please contact RéAnn Myers at 602-417-9413. Please include your AMC serial number(s) on all correspondence.

In accordance with 43 CFR 3833.33 you may transfer, sell, or otherwise convey an association placer mining claim at any time to an equal or greater number of mining claimants. If you want to transfer an association placer claim to an individual or an association that is smaller in number than the association that located the claim you (a) must have discovered a valuable mineral deposit before the transfer; or (b) upon notice from the Bureau of Land Management (BLM), you must reduce the acreage of the claim, if necessary, so that you meet the 20-acre per locator limit.

On November 10, 2015, BLM sent you a notice requesting that you show compliance with 43 CFR 3833.33 by providing either documentation of a discovery of a valuable mineral deposit for each of the four claims as listed prior to the claims being transferred from the original locators to yourself, or reducing the claim acreage to 120 acres per claim as allowed by law.

On December 8, 2015, information was provided to this office with the intent to show that a valuable mineral deposit existed on the claims prior to transfer.

The BLM determined that the information was incomplete to show that a valuable mineral deposit existed prior to the transfer of the claims to you.

The BLM is hereby giving you an opportunity to provide more information to prove discovery prior to the date whereby the following claims were transferred to a smaller number of claimants:

Claim Name	BLM Claim Number	Location
GEM NO 1	AMC310987	T19S R16E, Section 18, NW ¹ / ₄
GEM NO 2	AMC310988	T19S R16E, Section 18, NE ¹ / ₄

GEM NO 5	AMC310991	T19S R16E, Section 19, NW ¹ / ₄
GEM NO 6	AMC310992	T19S R16E, Section 19, SW ¹ / ₄
GEM7	AMC311330	T19S R16E, Section 17, NW ¹ / ₄

As stated in the enclosed Certified Review Mineral Examiner memo, the following information or additional information is needed:

- Map or maps showing the location of the mining claims and the location of related references, i.e., East and West Chispa, etc.
- Map or maps showing the location of samples, in relationship to the mining claims, which were taking in 1990 and 1997, and the findings resulting from each sample (gold quantity).
- The chart found on page 71 of the information provided is not completely legible and it is not clear as to the relationship of the data to the subject claims either in time or location.
- A showing of how the sampling resulted in a determination of an "ore reserve" of 10 million yards for the GEM claims.

Without this information we cannot determine if the claims are being properly held by a smaller number of claimants than required to meet the one claimant per each 20 acres of the claim requirement. Therefore, we are requiring that the above listed information be submitted to this office for review by a mineral examiner.

This required information must be dated **prior** to the date of transfer. If you do not have this information, then you must amend the claims listed above, reducing the acreage to 20 acres per claimant as allowed by law.

We must receive either this additional documentation supporting a discovery of a valuable mineral deposit, or amendments within 30 days of your receipt of this notice. If the required documentation or the amendments are not received within the 30-day timeframe the mining claims will be declared forfeited and void. If amendments are filed, there is a \$10 BLM processing fee for each amendment. The amendments must also be filed with the county.

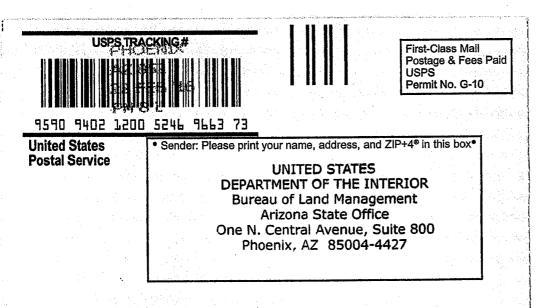

If additional information is required, please contact RéAnn Myers at 602-417-9413. Please include your AMC serial number(s) on all correspondence.

Association Placer Mining Claims Documentation or Amendments Required

The mining claims listed above are association placer mining claims that are over 20 acres in size. The claims were originally located with the required number of locators to meet the 20-acre per locator requirement. However, the claims are now held by a smaller group of claimants than originally located them and are therefore not in compliance with the legal requirements.

By law, each individual claimant is allowed to hold a maximum of 20 acres per claim. A corporation is considered to be a single entity that is allowed to hold a maximum of 20 acres per claim. In accordance with 43 CFR 3833.33 you may transfer, sell, or otherwise convey an association placer mining claim at any time to an equal or greater number of mining claimants. If you want to transfer an association placer claim to an individual or an association that is smaller in number than the association that located the claim you (a) must have discovered a valuable mineral deposit before the transfer; or (b) upon notice from the Bureau of Land Management (BLM), you must reduce the acreage of the claim, if necessary, so that you meet the 20-acre per locator limit.

In reviewing the case file for these claims it was noted that at the time of transfer to an individual or smaller number of locators than originally located the claims, BLM did not receive documentation supporting that a discovery of a valuable mineral deposit was made. Without this

documentation we cannot determine if the claims are being properly held by the correct number of claimants. Therefore, we are requiring that the appropriate documentation be submitted to BLM. We are enclosing a list to clarify what documentation must be provided to BLM to support the discovery of a valuable mineral deposit.

If you have the required documentation, dated **prior** to the date of transfer, you may file it with this office for review by a mineral examiner. If you do not have the proper documentation, you must amend the claims listed above, reducing the acreage to 20 acres per claimant, as is allowed by law.

We must receive either documentation supporting a discovery of a valuable mineral deposit, or amendments within 30 days of your receipt of this notice. If the required documentation or the amendments are not received within the 30-day timeframe the mining claims will be declared forfeited and void. If amendments are filed, there is a \$10 BLM processing fee for each amendment. The amendments must also be filed with the county.

If additional information is required, please contact RéAnn Myers at 602-417-9413. Please include your AMC serial number(s) on all correspondence.

Form MCF100a Revised July 2014 This form is available from the Arizona Geology Survey and may be reproduced. Memo to File: 12/9/15: Updated 3/28/16 From: Jeff Garrett-Certified Review Mineral Examiner #40 Subject: Compliance with 43 CFR 3833.33 RE: Gem 1-6 (AMC310987-AMC310992), Gem 7-9 (AMC311330-AMC311332)

BLM records indicate that the original association of locators included Georgia Montgomery, Georgette Montgomery, Granville Montgomery Jr., Granville Montgomery Sr., B.L. Montgomery, Donneta Montgomery, Allen Joos, and Vivian Joos. A quitclaim deed dated 7-17-91, filed with Pima County on 8/21/91, shows that Allen Joos and Vivian Joos conveyed their interest in the subject claims to G. Montgomery. The copy of the quitclaim found in BLM records shows both a BLM received, date stamp of 5/9/96 and a BLM received, date stamp of 12/14/12. There is no indication as to why the quitclaims deed was not processed on 5/9/96. The effective date of transfer is governed by state law. In this case the effective date is the date of recordation with the County on 8/21/91.

To show compliance with 43 CFR 3833.33, i.e. ... "must have discovered a valuable mineral deposit before the transfer..." information was delivered by G. Montgomery to the Arizona State Office on 12/8/15. This information was provided with the intent to show that a valuable mineral deposit existed on the claims, prior to transfer. Mr. Montgomery has requested that the information provided remain confidential.

The information submitted included the following:

· · · · ·

Introductory letter from G. Montgomery – extensive panning and electronic survey program initiated in 1990, defined "pay channels"; 2lbs of gold recovered from Gem 7&8. East and West Chisp produced 60 ounces of Au. Bulk testing was completed in 1997 verified old reports and 1990s sampling.

A 2008 "Business Economic Plan" indicating "ore reserves" and projected gold values; operational costs and projected income; a copy of a prospective purchase agreement containing information related to sampling that occurred in 1997 within "East and West Chispa"; projections as to average value per cubic yard; estimates as to average depth of gravels; references to historic mineral, mining and geologic reports related to the area in question; quotations from the 1997 California Mining Journal; summary of placer testing and reporting on Greaterville Placers; copy of an undated article by J M Hill, titled <u>Notes of the Placer Deposits of Greaterville, Arizona;</u> a copy of a section from <u>Arizona Gold Placers</u>, labeled Greaterville Placers; a reconnaissance report by Michael H. Owens (1996) with attachments; reconnaissance report by G Montgomery 1978; 1989 thru 1997; revised 2008; placer sample information related to samples taken in Chispa Gulch.

The information submitted, is incomplete and does not provide a prima facie case that a discovery existing on the subject claims before the date of transfer.

Additional information is needed and the current owner should be given the opportunity to provide additional information to show that a valuable mineral deposit was discovered on each of the subject claims prior to transfer.

The claimant should fully describe the reasons why the deposit claimed is believed to be a valuable mineral deposit. This should include sufficient details so that a mineral examiner can determine that the claim owner had a reasonable prospect of success in developing placer gold deposit at the time of transfer. The following information or additional information is needed:

Map or maps showing the location of the mining claims and the location of related references, i.e., East and West Chispa, etc.

Map or maps showing the location of samples, in relationship to the mining claims, which were taken in 1990 and 1997, and the findings resulting from each sample (gold quantity). The chart found on page 71 of the information provided, is not completely legible and it is not clear as to the relationship of the data to the subject claims either in time or location.

A showing of how the sampling resulted in a determination of an "ore reserve" of 10 million yards for, the Gem claims

On 3/15/16 Mr. Montgomery met with me to provide me with additional information as requested. Mr. Montgomery has requested that all information be treated as confidential and that the information provided, be returned.

Mr. Montgomery showed me the vialed gold samples resulting from sampling done on Gem#4 and Gem#5 and provided a map indicating sample locations, provided information as to the number of 5 gallon buckets processed and the amount of gold in penny weight recovered from each sample location. He explained where East and West Chispa was in relationship to the claims and explained that the chart found on page 71 was related to the sampling that occurred on Gem#4 and Gem#5. Mr. Montgomery could not provide any insight on the 10 million yard "ore reserve" and informed me that I would need to talk to the author of the report that designated the "ore reserve".

The information provided indicates a prim face argument to show that a valuable mineral deposit existed on the Gem#4 (AMC310990) and Gem#5 (AMC310991) claims, prior to transfer. Using geologic inference Gem#3 (AMC310989) can also be included as having a valuable mineral deposit prior to transfer.

Mr. Montgomery stated that no sampling had been done on Gem#1(AMC310987) or Gem#2 (AMC310988). He indicated that he had pan sampled Gem#6 (AMC310992) and Gem#9 (AMC311332) and had found gold nuggets, but he could not provide any additional supporting information. He indicated that he had metal detected and found 2.5 pounds of gold in one location on Gem#7 (AMC311330) and 1.2 ounces of gold at a location on Gem#8 (AMC311331) and indicated these locations on the map. It is not clear how these nugget hot spots related to the general geology of the area and whether or not similar nuggets or other gold can be found elsewhere on the claims. It seems that if the nuggets were the norm rather than the exception, then Mr. Montgomery would have continued in his metal detecting endeavors. There is no indication that there remains gold to be found as no other sampling was done.

The information submitted, provided a minimal prima facie case for a discovery for mining claims AMC310989, AMC38990 and AMC38991.

There was no information provided to show that samples were taken on lands encumbered by mining claims AMC310987 or AMC310988. To indicate discovery of a valuable mineral deposit on a specific claim, verifiable sampling must have occurred on that claim.

Even though mining claims AMC310992 and AMC311332 were pan sampled, no supporting information was provided to substantiate what the samples represented. Information was not provided to indicate sample volume, material sampled, raw gold recovered, raw gold weight, or reserve estimates.

Though gold nuggets were discovered through metal detecting on AMC311330 and AMC311331, insufficient information was provided to show that there was an adequate resource that could be mined and processed so as to have a valuable mine, i.e. no reserve estimate, no deposit boundary, no development or processing costs, equipment to be used, or breakdown of costs (equipment operation, labor, supplies, equipment costs and development and reclamation costs) specific to these two claims was provided.

The information submitted was insufficient to show that a valuable mineral deposit was discovered prior to the transfer of AMC310992, AMC311332, AMC310987, AMC310988, AMC311330 and AMC311331.

Memo to File: 12/9/15 From: Jeff Garrett-Certified Review Mineral Examiner #40 Subject: Compliance with 43 CFR 3833.33 RE: Gem 1-6 (AMC310987-AMC310992), Gem 7-9 (AMC311330-AMC311332)

BLM records indicate that the original association of locators included Georgia Montgomery, Georgette Montgomery, Granville Montgomery Jr., Granville Montgomery Sr., B.L. Montgomery, Donneta Montgomery, Allen Joos, and Vivian Joos. A quitclaim deed dated 7-17-91, filed with Pima County on 8/21/91, shows that Allen Joos and Vivian Joos conveyed their interest in the subject claims to G. Montgomery. The copy of the quitclaim found in BLM records shows both a BLM received, date stamp of 5/9/96 and a BLM received, date stamp of 12/14/12. There is no indication as to why the quitclaims deed was not processed on 5/9/96. The effective date of transfer is governed by state law. In this case the effective date is the date of recordation with the County on 8/21/91.

To show compliance with 43 CFR 3833.33, i.e. ... "must have discovered a valuable mineral deposit before the transfer..." information was delivered by G. Montgomery to the Arizona State Office on 12/8/15. This information was provided with the intent to show that a valuable mineral deposit existed on the claims, prior to transfer. Mr. Montgomery has requested that the information provided remain confidential.

The information submitted included the following:

y The arr

Introductory letter from G. Montgomery – extensive panning and electronic survey program initiated in 1990, defined "pay channels"; 2lbs of gold recovered from Gem 7&8. East and West Chisp produced 60 ounces of Au. Bulk testing was completed in 1997 verified old reports and 1990s sampling.

A 2008 "Business Economic Plan" indicating "ore reserves" and projected gold values; operational costs and projected income; a copy of a prospective purchase agreement containing information related to sampling that occurred in 1997 within "East and West Chispa"; projections as to average value per cubic yard; estimates as to average depth of gravels; references to historic mineral, mining and geologic reports related to the area in question; quotations from the 1997 California Mining Journal; summary of placer testing and reporting on Graterville Placers; copy of an undated article by J M Hill, titled <u>Notes of the Placer Deposits of Greaterville, Arizona</u>; a copy a section from <u>Arizona Gold Placers</u>, labeled Greaterville Placers; a reconnaissance report by Michael H. Owens (1996) with attachments; reconnaissance report by G Montgomery 1978; 1989 thru 1997; revised 2008; placer sample information related to samples taken in Chispa Gulch.

The information submitted, is incomplete and does not provide a prima facie case that a discovery existing on the subject claims before the date of transfer.

Additional information is needed and the current owner should be given the opportunity to provide additional information to show that a valuable mineral deposit was discovered on each of the subject claims prior to transfer.

The claimant should fully describe the reasons why the deposit claimed is believed to be a valuable mineral deposit. This should include sufficient details so that a mineral examiner can determine that the claim owner had a reasonable prospect of success in developing placer gold deposit at the time of transfer. The following information or additional information is needed:

Map or maps showing the location of the mining claims and the location of related references, i.e., East and West Chispa, etc.

Map or maps showing the location of samples, in relationship to the mining claims, which were taken in 1990 and 1997, and the findings resulting from each sample (gold quantity). The chart found on page 71 of the information provided, is not completely legible and it is not clear as to the relationship of the data to the subject claims either in time or location.

A showing of how the sampling resulted in a determination of an "ore reserve" of 10 million yards for, the Gem claims
