Memo to File(s): 7/29/14 & Addendum to Memo dated 9/17/14

From: Jeff Garrett-Certified Review Mineral Examiner #40

Subject: Compliance with 43 CFR 3833.33

RE: AMC361966 - AMC361973

On 09/018/08 AMC361966 - AMC361973 160 acre association placer claims were transferred from the original Association Placer locators to La Aguila SE HA Escapado LLC and Mike Ramer. To show compliance with 43 CFR 3833.33, i.e. ... "must have discovered a valuable mineral deposit before the transfer..." the current claimant(s) provided information intended to show that a valuable mineral deposit existed on the claims prior to transfer of the association placers from the original locators to the current claimant(s).

The subject claims are located on 07/06/04, in sections 28 and 34, T7S, R12E; Pinal County, AZ.

The information provided was a confidential "Executive Business Summary and Proposal" report dated 9/21/01. This report was prepared in support of four 160 acre association placer claims located on 01/13/00 (AMC353246-AMC353249) in section 28, T7S, R12E. These claims were closed on 09/03/03.

The 9/21/01 report contained an "Economic Geology Report for Coyote Placer-Black Mountain Mineral District of Pinal County, Arizona" dated 05/14/01 by Ronald J. Pgeifer, No. G-449, Registered Geologist, Metallurgist and Assayer. This report included several documents discussing previous work done in the area and on adjacent lands related to potential iron and precious metal mineralization. The 9/21/01 report and the imbedded 05/14/01 report did not provided any information specific to the subject claims except through geologic inference.

On 8/27/14, Sivonn Norng visited ASO, and requested further review of the information she had previously provided, indicating that certain information buried in the documentation supported discovery and that this information needed to be given greater consideration.

I reviewed the information provided. Taking the information at face value, even though there are some data gaps, inconsistencies and questionable practices and conclusions interwoven in the information provided, overall the claimant provided the information requested by the BLM. Discovery now becomes a question of fact.

All information provided by the claimant was considered to be confidential and was returned and thus is not found in this case file.

At this time the claimant should not be required to reduce the subject claims.

Dear: Ms Brown,

Per our phone conversation on Thursday , Sept 4th, 2014 at 9:41 AM, regarding the Coyote claims. You mentioned to me that nothing have been done regarding the claims papers work yet, due to the busyness at this time of the year. You suggested to me to write a letter to you regarding the meeting with Jeff Garrett and re-submitted the document to him to review again.

In respond to certified Mail – Return receipt No 7014 1200 0000 8265 1739, (I, Sivonn Norng act as P.O.A. for Mike Ramer), had a meeting with Jeff Garrett – Certified Review Mineral Examiner # 40 on August 27th, 2014 to re-submitted the same document that was left for him on July 27th, 2014. In the document contains the test Assay from 2001 by 3 different Geologies on Coyote claims. Jeff told me that he will review the Assay documents that had performed on 2001 from 300 lbs of material from Mike Ramer Coyote claim. He will ship back the document to me at the following address:

You received a Notice to inform you that the mining claims listed above are association placer mining claims that are over 20 acres in size and are currently held by a smaller number of claimants than is permitted by law, unless there was a discovery of a valuable mineral deposit prior to the date of transfer. The Notice required that you provide documentation to support a discovery of a valuable mineral deposit or amend the claims to comply with the 20-acre per claimant requirement.

In response to the Notice, you submitted documentation you believe shows such a discovery. The documentation has been examined by a mineral examiner and it has been determined that the submitted documentation is insufficient and does not include the information requested. The subject claims are located on 07/06/04, in sections 28 and 32, T7S, R12E; Pinal County, AZ.

The information provided was a confidential "Executive Business Summary and Proposal" report dated 9/21/01. This report was prepared in support of four 160 acre association placer claims located on 01/13/00 (AMC353246-AMC353249) in section 28, T7S, R12E. These claims were closed on 09/03/03.

The 9/21/01 report contained an "Economic Geology Report for Coyote Placer-Black Mountain Mineral District of Pinal County, Arizona" dated 05/14/01 by Ronald J. Pgeifer, No. G-449, Registered Geologist, Metallurgist and Assayer. This report included several documents discussing previous work done in the area and on adjacent lands related to potential iron and precious metal mineralization. The 9/21/01 report and the imbedded 05/14/01 report did not provided any information specific to the subject claims except through geologic inference. There was no information provided specific to any samples that may have been taken from the subject claims.

All confidential information provided by the claimant was returned and thus is not found in this file.

The information submitted was insufficient to show that a valuable mineral deposit was discovered prior to transfer.

MUST AMEND DUE TO EXCESS ACREAGE

You received a Notice to inform you that the mining claims listed above are association placer mining claims that are over 20 acres in size and are currently held by a smaller number of claimants than is permitted by law, unless there was a discovery of a valuable mineral deposit prior to the date of transfer. The Notice required that you provide documentation to support a discovery of a valuable mineral deposit or amend the claims to comply with the 20-acre per claimant requirement.

In response to the Notice, you submitted documentation you believe shows such a discovery. The documentation has been examined by a mineral examiner and it has been determined that the submitted documentation is insufficient and does not include the information requested. (See enclosed comment from mineral examiner.) Therefore, BLM is requiring that the acreage of the above listed mining claims be reduced to comply with the 20-acre per claimant requirement.

Unable to forward

There is a \$10 BLM processing fee for each amendment. We must receive the amendments within 30 days of receipt of this notice. If the amendments are not received within the 30 day timeframe the mining claims will be declared forfeited and void.

If additional information is required, please contact Pauline Brown at 602-417-9360. Please include your AMC serial number(s) on all correspondence.

Association Placer Mining Claims Documentation or Amendments Required

The mining claims listed above are association placer mining claims that are over 20 acres in size. The claims were originally located with the required number of locators to meet the 20-acre per locator requirement. However, the claims are now held by a smaller group of claimants than originally located them and are therefore not in compliance with the legal requirements.

By law, each individual claimant is allowed to hold a maximum of 20 acres per claim. A corporation is considered to be a single entity that is allowed to hold a maximum of 20 acres per claim. In accordance with 43 CFR 3833.33 you may transfer, sell, or otherwise convey an association placer mining claim at any time to an equal or greater number of mining claimants. If you want to transfer an association placer claim to an individual or an association that is

smaller in number than the association that located the claim you (a) must have discovered a valuable mineral deposit before the transfer; or (b) upon notice from BLM, you must reduce the acreage of the claim, if necessary, so that you meet the 20-acre per locator limit.

In reviewing the case file for these claims it was noted that at the time of transfer to an individual or small number of locators than originally located the claims, BLM did not receive documentation supporting that a discovery of a valuable mineral deposit was made. Without this documentation we cannot determine if the claims are being properly held by the correct number of claimants. Therefore, we are requiring that the appropriate documentation be submitted to BLM. We are enclosing a guide to clarify what documentation must be provided to BLM to support the discovery of a valuable mineral deposit.

If you have the required documentation, dated **prior** to the date of transfer, you may file it with this office for review. If you do not have the proper documentation, you must amend the claims listed above, reducing the acreage to 20 acres per claimant, as is allowed by law.

We must receive either documentation supporting a discovery of a valuable mineral deposit, or amendments within 30 days of your receipt of this notice. If the required documentation or the amendments are not received within the 30-day timeframe the mining claims will be declared forfeited and void. If amendments are filed, there is a \$10 BLM processing fee for each amendment. The amendments must also be filed with the county.

If additional information is required, please contact Pauline Brown at 602-417-9360. Please include your AMC serial number(s) on all correspondence.

REQUIREMENTS FOR TRANSFERRING ASSOCIATION PLACER MINING CLAIMS

Under the Mining Law of 1872, 30 U.S.C. 36, an "association of persons" may locate placer mining claims in excess of 20 acres in size. The Bureau of Land Management's (BLM) regulations at 43 CFR 3833.33(a) allow mining claimants to transfer or convey an association placer claim to a smaller number of owners than originally located the claim, including a single owner, under certain conditions.

What are the restrictions on transferring or conveying an association placer mining claim to a smaller number of owners than originally located the claim?

Under the BLM's regulations at 43 CFR 3833.33(a), it is permissible to transfer or convey an association placer claim over 20 acres in size to a smaller number of owners than originally locate the claim only if a "discovery of a valuable mineral deposit" was made within the limits of the claim *prior* to the date of transfer.

What does "discovery of a valuable mineral deposit" mean?

For purposes of the Mining Law, "discovery of a valuable mineral deposit" means that minerals have been found within the boundaries of the mining claim and that the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

In addition, for a discovery to exist the deposit must be marketable; that is, of such value that it can be mined, removed and disposed of at a profit.

A discovery has not been made until sufficient work has been done to show that the material can be produced and sold at a profit under conditions present at the time of transfer. The mineral deposit possessing in and of itself a present or prospective value for mining purposes must be actually and physically exposed in sufficient quantities to justify development of the mining claim through actual mining operations. If the deposit requires additional exploration to delineate the ore reserves and determine grade or quality before development may be confidently started, a discovery has not been made.

Sampling must have occurred on the subject claim. You will need several quantitative samples to adequately show a discovery of an association placer mining claim.

Sampling should be done at as many places on the claim as may be necessary to establish the continuity and extent of the deposit. Until sampling has been completed, it is rarely possible to develop anything more than an informed guess as to the nature of any deposit. There must be something beyond a mere surmise, speculation, belief, or geological theory or impression of the existence of minerals on a mining claim to

constitute a discovery of a valuable mineral deposit that would satisfy the regulations for transferring or conveying an association placer mining claim. Mere indications of existence of minerals within the boundaries of the claim or on adjoining lands are not sufficient to support a discovery of a valuable mineral deposit.

What information should I provide to the BLM to support that my association placer mining claim(s) had a discovery of a valuable mineral deposit at the time of transfer or conveyance?

Although the BLM's analysis is made on a case-by-case basis, the following information will generally be helpful to the BLM to support that a discovery of a valuable mineral deposit existed on the association placer mining claim(s) *prior* to the date of transfer.

1. A map showing the claim location and claim boundary.
2. Sampling information
 - a. Map showing sampling locations
 - b. Sample volume and interval
 - c. Material sampled
 - d. Raw gold recovered and raw gold weight (grams/bank cubic yards)
 - e. Raw gold value (\$/bank cubic yard)
 - i. Using the price of gold per Troy ounce at the time the discovery was made
 - ii. Gold value must be adjusted for fineness as placer gold is never 100% pure
3. Reserve Estimate
 - a. Map showing deposit boundaries
 - b. Method used to calculate reserve estimate
 - c. Cut-off grade
4. Development Costs (\$/bank cubic yard)
 - a. Road construction
 - b. Exploration
 - c. Mobilization
 - d. Ponds
 - e. Stripping
 - f. Plant construction
 - g. Buildings
 - h. Pipe/couplings
 - i. Demobilization
5. Cost of Equipment – list all equipment and the cost less salvage value
6. Cost of Operation (\$/bank cubic yard) – equipment operation, labor and supplies
7. Reclamation costs

Association Placer Mining Claims Documentation or Amendments Required

The mining claims listed above are association placer mining claims that are over 20 acres in size. The claims were originally located with the required number of locators to meet the 20-acre per locator requirement. However, the claims are now held by a smaller group of claimants than originally located them and are therefore not in compliance with the legal requirements.

By law, each individual claimant is allowed to hold a maximum of 20 acres per claim. A corporation is considered to be a single entity that is allowed to hold a maximum of 20 acres per claim. In accordance with 43 CFR 3833.33 you may transfer, sell, or otherwise convey an association placer mining claim at any time to an equal or greater number of mining claimants. If you want to transfer an association placer claim to an individual or an association that is smaller in number than the association that located the claim you (a) must have discovered a valuable mineral deposit before the transfer; or (b) upon notice from BLM, you must reduce the acreage of the claim, if necessary, so that you meet the 20-acre per locator limit.

In reviewing the case file for these claims it was noted that at the time of transfer to an individual or small number of locators than originally located the claims, BLM did not receive documentation supporting that a discovery of a valuable mineral deposit was made. Without this documentation we cannot determine if the claims are being properly held by the correct number

of claimants. Therefore, we are requiring that the appropriate documentation be submitted to BLM. We are enclosing a guide to clarify what documentation must be provided to BLM to support the discovery of a valuable mineral deposit.

If you have the required documentation, dated **prior** to the date of transfer, you may file it with this office for review. If you do not have the proper documentation, you must amend the claims listed above, reducing the acreage to 20 acres per claimant, as is allowed by law.

We must receive either documentation supporting a discovery of a valuable mineral deposit, or amendments within 30 days of your receipt of this notice. If the required documentation or the amendments are not received within the 30-day timeframe the mining claims will be declared forfeited and void. If amendments are filed, there is a \$10 BLM processing fee for each amendment. The amendments must also be filed with the county.

If additional information is required, please contact Pauline Brown at 602-417-9360. Please include your AMC serial number(s) on all correspondence.

REQUIREMENTS FOR TRANSFERRING ASSOCIATION PLACER MINING CLAIMS

Under the Mining Law of 1872, 30 U.S.C. 36, an "association of persons" may locate placer mining claims in excess of 20 acres in size. The Bureau of Land Management's (BLM) regulations at 43 CFR 3833.33(a) allow mining claimants to transfer or convey an association placer claim to a smaller number of owners than originally located the claim, including a single owner, under certain conditions.

What are the restrictions on transferring or conveying an association placer mining claim to a smaller number of owners than originally located the claim?

Under the BLM's regulations at 43 CFR 3833.33(a), it is permissible to transfer or convey an association placer claim over 20 acres in size to a smaller number of owners than originally locate the claim only if a "discovery of a valuable mineral deposit" was made within the limits of the claim *prior* to the date of transfer.

What does "discovery of a valuable mineral deposit" mean?

For purposes of the Mining Law, "discovery of a valuable mineral deposit" means that minerals have been found within the boundaries of the mining claim and that the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his labor and means, with a reasonable prospect of success, in developing a valuable mine.

In addition, for a discovery to exist the deposit must be marketable; that is, of such value that it can be mined, removed and disposed of at a profit.

A discovery has not been made until sufficient work has been done to show that the material can be produced and sold at a profit under conditions present at the time of transfer. The mineral deposit possessing in and of itself a present or prospective value for mining purposes must be actually and physically exposed in sufficient quantities to justify development of the mining claim through actual mining operations. If the deposit requires additional exploration to delineate the ore reserves and determine grade or quality before development may be confidently started, a discovery has not been made.

Sampling must have occurred on the subject claim. You will need several quantitative samples to adequately show a discovery of an association placer mining claim.

Sampling should be done at as many places on the claim as may be necessary to establish the continuity and extent of the deposit. Until sampling has been completed, it is rarely possible to develop anything more than an informed guess as to the nature of any deposit. There must be something beyond a mere surmise, speculation, belief, or geological theory or impression of the existence of minerals on a mining claim to

constitute a discovery of a valuable mineral deposit that would satisfy the regulations for transferring or conveying an association placer mining claim. Mere indications of existence of minerals within the boundaries of the claim or on adjoining lands are not sufficient to support a discovery of a valuable mineral deposit.

What information should I provide to the BLM to support that my association placer mining claim(s) had a discovery of a valuable mineral deposit at the time of transfer or conveyance?

Although the BLM's analysis is made on a case-by-case basis, the following information will generally be helpful to the BLM to support that a discovery of a valuable mineral deposit existed on the association placer mining claim(s) *prior* to the date of transfer.

1. A map showing the claim location and claim boundary.

Association Placer Mining Claims Documentation or Amendments Required

The mining claims listed above are association placer mining claims that are over 20 acres in size. The claims were originally located with the required number of locators to meet the 20-acre per locator requirement. However, the claims are now held by a smaller group of claimants than originally located them and are therefore not in compliance with the legal requirements.

By law, each individual claimant is allowed to hold a maximum of 20 acres per claim. A corporation is considered to be a single entity that is allowed to hold a maximum of 20 acres per claim. In accordance with 43 CFR 3833.33 you may transfer, sell, or otherwise convey an association placer mining claim at any time to an equal or greater number of mining claimants. If you want to transfer an association placer claim to an individual or an association that is

smaller in number than the association that located the claim you (a) must have discovered a valuable mineral deposit before the transfer; or (b) upon notice from BLM, you must reduce the acreage of the claim, if necessary, so that you meet the 20-acre per locator limit.

In reviewing the case file for these claims it was noted that at the time of transfer to an individual or small number of locators than originally located the claims, BLM did not receive documentation supporting that a discovery of a valuable mineral deposit was made. Without this documentation we cannot determine if the claims are being properly held by the correct number of claimants. Therefore, we are requiring that the appropriate documentation be submitted to BLM. We are enclosing a guide to clarify what documentation must be provided to BLM to support the discovery of a valuable mineral deposit.

If you have the required documentation, dated **prior** to the date of transfer, you may file it with this office for review. If you do not have the proper documentation, you must amend the claims listed above, reducing the acreage to 20 acres per claimant, as is allowed by law.

We must receive either documentation supporting a discovery of a valuable mineral deposit, or amendments within 30 days of your receipt of this notice. If the required documentation or the amendments are not received within the 30-day timeframe the mining claims will be declared forfeited and void. If amendments are filed, there is a \$10 BLM processing fee for each amendment. The amendments must also be filed with the county.

If additional information is required, please contact Pauline Brown at 602-417-9360. Please include your AMC serial number(s) on all correspondence.

Sincerely,

Rebecca Heick

Memo to File(s): 7/29/14 & Addendum to Memo dated 9/17/14

From: Jeff Garrett-Certified Review Mineral Examiner #40

Subject: Compliance with 43 CFR 3833.33

RE: AMC361966 - AMC361973

On 09/018/08 AMC361966 - AMC361973 160 acre association placer claims were transferred from the original Association Placer locators to La Aguila SE HA Escapado LLC and Mike Ramer. To show compliance with 43 CFR 3833.33, i.e. ... "must have discovered a valuable mineral deposit before the transfer..." the current claimant(s) provided information intended to show that a valuable mineral deposit existed on the claims prior to transfer of the association placers from the original locators to the current claimant(s).

The subject claims are located on 07/06/04, in sections 28 and 34, T7S, R12E; Pinal County, AZ.

The information provided was a confidential "Executive Business Summary and Proposal" report dated 9/21/01. This report was prepared in support of four 160 acre association placer claims located on 01/13/00 (AMC353246-AMC353249) in section 28, T7S, R12E. These claims were closed on 09/03/03.

The 9/21/01 report contained an "Economic Geology Report for Coyote Placer-Black Mountain Mineral District of Pinal County, Arizona" dated 05/14/01 by Ronald J. Pgeifer, No. G-449, Registered Geologist, Metallurgist and Assayer. This report included several documents discussing previous work done in the area and on adjacent lands related to potential iron and precious metal mineralization. The 9/21/01 report and the imbedded 05/14/01 report did not provided any information specific to the subject claims except through geologic inference.

On 8/27/14, Sivonn Norng visited ASO, and requested further review of the information she had previously provided, indicating that certain information buried in the documentation supported discovery and that this information needed to be given greater consideration.

I reviewed the information provided. Taking the information at face value, even though there are some data gaps, inconsistencies and questionable practices and conclusions interwoven in the information provided, overall the claimant provided the information requested by the BLM. Discovery now becomes a question of fact.

All information provided by the claimant was considered to be confidential and was returned and thus is not found in this case file.

At this time the claimant should not be required to reduce the subject claims.

Memo to File(s): 7/29/14

From: Jeff Garrett-Certified Review Mineral Examiner #40

Subject: Compliance with 43 CFR 3833.33

RE: AMC361966 - AMC361973

On 09/018/08 AMC361966 - AMC361973 160 acre association placer claims were transferred from the original Association Placer locators to La Aguila SE HA Escapado LLC and Mike Ramer. To show compliance with 43 CFR 3833.33, i.e. ..."must have discovered a valuable mineral deposit before the transfer..." the current claimant(s) provided information intended to show that a valuable mineral deposit existed on the claims prior to transfer of the association placers from the original locators to the current claimant(s).

The subject claims are located on 07/06/04, in sections 28 and 32, T7S, R12E; Pinal County, AZ.

The information provided was a confidential "Executive Business Summary and Proposal" report dated 9/21/01. This report was prepared in support of four 160 acre association placer claims located on 01/13/00 (AMC353246-AMC353249) in section 28, T7S, R12E. These claims were closed on 09/03/03.

The 9/21/01 report contained an "Economic Geology Report for Coyote Placer-Black Mountain Mineral District of Pinal County, Arizona" dated 05/14/01 by Ronald J. Pgeifer, No. G-449, Registered Geologist, Metallurgist and Assayer. This report included several documents discussing previous work done in the area and on adjacent lands related to potential iron and precious metal mineralization. The 9/21/01 report and the imbedded 05/14/01 report did not provided any information specific to the subject claims except through geologic inference. There was no information provided specific to any samples that may have been taken from the subject claims.

All confidential information provided by the claimant was returned and thus is not found in this file.

The information submitted was insufficient to show that a valuable mineral deposit was discovered prior to transfer.
