Discrepancies Noted on Location Notice(s)

Pursuant to Title 43 Code of Federal Regulations 3832.1, this office received your notice(s) of location for recordation of mining claims.

However, the following discrepancies were noted:

X The legal description on the location notice does not match the depiction of the claim on the map. We have described the claim in our system according to the map. If this is not correct, you may want to either amend your location notice or provide a corrected map.

_____ The quarter section in which the claim lies is not included on the location notice, as required. We were able to determine this information from the map; however, you may want to amend your location notice to include the proper legal description. A proper legal description must include the state, meridian, township, range, section and by aliquot part to the quarter section.

_____ The legal description on the location notice contains only one quarter section; however, the map shows that the claim lies in more than one quarter section. We have entered all the quarter sections depicted on the map in our system. You may want to either amend your location notice or provide a corrected map.

_____ The map provided is not adequate. The map should clearly depict the boundaries of the section and quarter section and where the claim lies within the quarter section. You may want to provide a corrected map that correctly depicts your claim.

If additional information is required, please contact Rod Ebert at 602-417-9397. Please include your AMC number(s) on all correspondence.
