Memorandum to Casefile

July 10, 2014

Re: transfer of AMC413297 – AMC413300 from a larger number of owners (2) to a single owner

David and Debra Knight submitted documentation during the period of April and May of 2013. This documentation was filed in order to prove discovery of a valuable mineral deposit prior to the transfer filed April 10, 2013.

Jeff Garrett, AZSO Geologist, reviewed the documentation filed to prove discovery of a valuable mineral deposit. The information was found sufficient prima facie documentation to indicate discovery of a valuable mineral deposit prior to the transfer dated March 25, 2013.

Therefore, the transfer of AMC413297 – AMC413300 (80 acres each) from Mr. and Mrs. Malouf to the Knight Trust was allowed.

Quit Claim Deed for BB claims and discovery documentation.

David C. Knight <davidcknight@frontiernet.net>

Fri, Jun 28, 2013 at 3:27 PM

To: Rod Ebert <rebert@blm.gov>

Dear Mr. Ebert:

Thank you for the call and information and patience listening to me.

Attached is the Quit Claim Deed for the BB claims. It was drafted by Jerry Haggard, an attorney who specialized in Arizona mineral law.

Under advice from attorneys we staked the placer claims over the senior Mary Copper and Rainbow Copper lode claims to prevent any possible conflicts if someone decided to stake a placer claim over the gold resource contained in the Big Bug Creed gravels covered by the lode claims.

Big Bug Creek has been placer mined for over 100 years and has even been dredged. I have attached two evaluation reports, 1963 and 1979, which evaluated the Big Bug gravels. I also attached a dated summary report of the area done in February 2012. Since then we have added three other placer claims and bought a parcel of private land.

Please keep these reports confidential. Hopefully we will release the information once operations begin at a professional meeting or as a paper in a journal.

Please let me know if we need to do anything to keep within the regulations. Thank you again.

Best Regards,

David C. Knight

2013 Maintenance Fees - Additional Fees Required

Your maintenance fee payment for the 2013 assessment year, in the amount of \$140 per claim, for the placer claims listed above, has been received and is insufficient. **The total due on your claim(s) is: \$51,680.**

In accordance with the Consolidated Appropriations Act of 2012, Public Law 112-74 (125 Stat 1047), and FR44155-44158 (2012) Congress changed the way maintenance fees for placer mining claims are assessed. Instead of charging the maintenance fee on a per-claim basis, Congress stated that the fee, which is currently \$140, will be assessed on each 20 acre parcel of a placer claim or portion thereof.

Insufficient payment of the annual maintenance fee for the 2013 assessment year is a curable defect. **Therefore you are required to do one of the following within 30 days of receipt of this notice or your claim(s) will be declared forfeited:** 1) submit additional fees of \$140 per 20-acres or portion thereof based on the full acreage of the claim, or 2) amend the claim(s) to reduce the acres so a lesser fee is due and submit any additional fees due; or 3) relinquish the claim(s) in their entirety, in which case BLM will refund the maintenance fees you have already paid for the 2013 assessment year.

If you choose to amend the claims to reduce the acres, you must submit an amended location notice for each claim, with an accurate description and dimensions of the reduced claim, along with a map depicting the reduced claim, and a \$10 processing fee per amendment. An amendment must also be recorded at the county. If the amended claim contains more than 20 acres, calculate the additional fees due and submit those fees with the amendment(s).

2013 Maintenance Fees - Additional Fees Required

Your maintenance fee payment for the 2013 assessment year, in the amount of \$140 per claim, for the placer claims listed above, has been received and is insufficient. **The total due on your claim(s) is: \$51,680.**

In accordance with the Consolidated Appropriations Act of 2012, Public Law 112-74 (125 Stat 1047), and FR44155-44158 (2012) Congress changed the way maintenance fees for placer mining claims are assessed. Instead of charging the maintenance fee on a per-claim basis, Congress stated that the fee, which is currently \$140, will be assessed on each 20 acre parcel of a placer claim or portion thereof.

Insufficient payment of the annual maintenance fee for the 2013 assessment year is a curable defect. **Therefore you are required to do one of the following within 30 days of receipt of this notice or your claim(s) will be declared forfeited:** 1) submit additional fees of \$140 per 20-acres or portion thereof based on the full acreage of the claim, or 2) amend the claim(s) to reduce the acres so a lesser fee is due and submit any additional fees due; or 3) relinquish the claim(s) in their entirety, in which case BLM will refund the maintenance fees you have already paid for the 2013 assessment year.

If you choose to amend the claims to reduce the acres, you must submit an amended location notice for each claim, with an accurate description and dimensions of the reduced claim, along with a map depicting the reduced claim, and a \$10 processing fee per amendment. An amendment must also be recorded at the county. If the amended claim contains more than 20 acres, calculate the additional fees due and submit those fees with the amendment(s).

§ 370.0-3 Segregative effect and opening: Federal Power Act withdrawals.

(a)(1) The filing of an application for a power project with the Federal Energy Regulatory Commission withdraws the lands covered by the application from the operation of the public land laws; however, the lands remain open to the location, lease or disposal of the mineral estate.

(2) The issuance of a permit or license for a project by the Federal Energy Regulatory Commission withdraws the lands from the operation of the mining laws. (See part 3720).

(b) Lands withdrawn under section 24 of the Federal Power Act remain withdrawn until the withdrawal is vacated and the lands opened by proper authority.

(c) After a withdrawal has been vacated, the lands are opened to the operation of the public land laws by notation of the lands records to that effect.

With FERC concurrence, lands can be patented subject to section 24, without vacating the withdrawal. Would open to land exchange, sale, etc. SD should be able to open the land when the wdl is not vacated

Subpart 3730—Public Law 359: Mining in Powerate Withdrawals: General

§ 3730.0-1 Purpose; lands open.

(a) The purpose of the Mining Claims Rights Restoration Act of August 11, 1955 (Act), is to permit the mining, development, and utilization of the mineral resources of all public lands withdrawn or reserved for power development and other purposes, except for lands that:

(1) Are included in any project operating or being constructed under a license or permit issued under the Federal Power Act or other Act of Congress, or

(2) Are under examination and survey by a prospective licensee of the Federal Energy Regulatory Commission under an uncancelled preliminary permit that has not been renewed more than once.

(b) Locations made under the Act on lands withdrawn or reserved for power development within the reverted Oregon and California Railroad and Reconveyed Coos Bay Wagon Road Grant Lands are also subject to the provisions of the Act of April 2, 1948 (62 Stat. 162). See subpart 3821 of this title.

(50 FR 44564, Aug. 20, 1985)

§ 3730.0-3 Authority.

The authorities for the regulations in this part are the Act of August 11, 1955 (30 U.S.C. 821-825); § 314 of the Act of October 21, 1976 (48 U.S.C. 1764); 30 U.S.C. 281-k, 107 Stat. 402.

(50 FR 44564, Aug. 20, 1985)

P.L. 359 (MCRRA) opened Waterpower Resource and Reservoir Resource wdl's to mining except for active power projects as shown above.

See 89-370 P. 2 A. 2.

WATERPOWER AND FERC

Waterpower withdrawals are Powersite Classifications, Powersite Reserves and Water Power Designations. In Arizona you only have Water Power Designations. These withdrawals were made to protect future water power projects.

Passage of the Federal Power Act in 1920 created the Federal Power Commission which regulated development of Power Projects. The FPA ultimately became the Federal Energy Regulatory Commission or FERC. This is a licensing agency, not a land management agency.

These lands were originally closed to all uses but on August 11, 1955, these withdrawals were opened to mining subject to Section 24 of the Federal Power Act. This is Public Law 359. When a mining claim is filed is filed under P.L. 359 FERC is notified and if FERC objects they notify BLM. FERC would only object if they knew that there was a project pending on those lands. Usually FERC doesn't respond and the claim can be patented subject to section 24 of the FPA.

They are considered to be BLM withdrawals but they cannot be revoked or modified without the concurrence of FERC. These were identified by Engineering Evaluations as having potential for future waterpower development. When an exchange or other land action is proposed on waterpower withdrawals, the withdrawal adjudicator is asked to modify or revoke the withdrawal. The engineering evaluation is checked, if the land in question has potential for waterpower the withdrawal is modified under Section 24 of the FPA. I
