Mining Claim Location Notice(s) – Amendment(s) Required

Pursuant to Title 43 Code of Federal Regulations (CFR) 3832.1, the Bureau of Land Management (BLM), Arizona State Office, received your notices of location for recording mining claims. In accordance with 43 CFR 3832.12, the claims listed above cannot be accepted as filed and must be amended as noted below.

The claims are not described with a proper metes and bounds description. A proper metes and bounds description is required to accurately determine the location of the claim. Your description of AMC443130 indicates that the Southeast corner is 1,300' north of the marker for sections 22 and 27, but does not indicate the bearing from each corner of the claim to the next corner. Your description of the claim should clearly mark the boundaries of both the section and quarter section and should depict where within the quarter section the claim lies. The map should be accurate enough for BLM to identify the mining claims or sites on the ground.

You indicate that the northeast corner of the AMC443131 is 1,500' "almost" north to the NE corner of section 26 and the SE corner of section 23, but your map shows sections 25 and 26, not section 23. Please indicate the actual northerly bearing to the corner of your claim and the correct sections. Please include a mining claim map that shows the correct section boundaries for each section related to your claim.

Please indicate the proper bearing from one corner of the claim to the next corner. Your description should clearly mark the boundaries of both the section and quarter section and should depict where within the quarter section the claim lies. The map should be accurate enough for BLM to identify the mining claims or sites on the ground.

In accordance with 43 CFR 3832.12 a lode claim must be described by metes and bounds and include a tie to a permanent monument such as a section quarter corner monument. All claim descriptions must include state, meridian, township, range, section and by aliquot part to the quarter section.

An amendment must be filed for each claim listed above to correct the defects identified. There is a \$10 BLM processing fee for each amendment. The amendments must be received by BLM within 30 days of your receipt of this notice. If the amendments are not received within the 30-day timeframe the mining claims will be declared null and void.

If additional information is required, please contact Brent Squires at 602-417-9398. Please include your AMC serial number(s) on all correspondence.

Lucas Lucero
Deputy State Director
Lands, Minerals and Energy Division

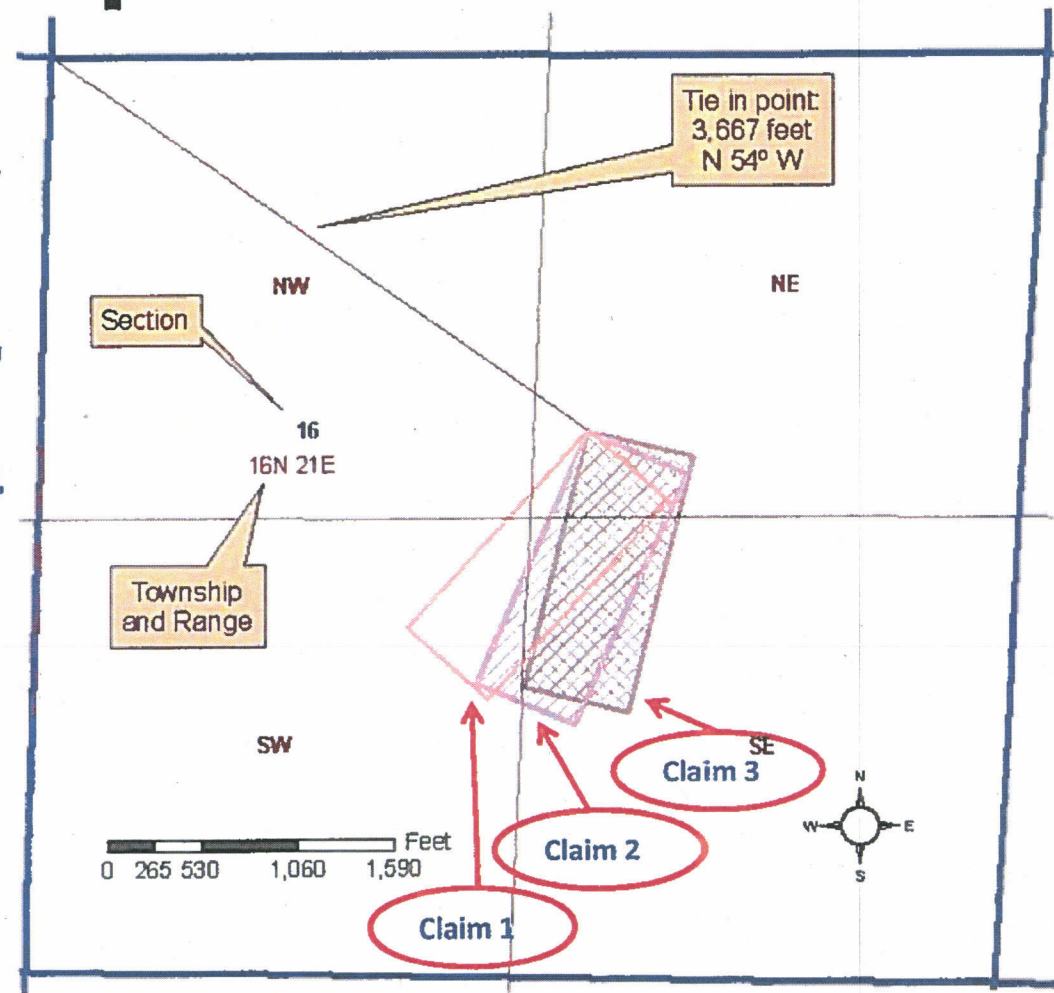

Enclosure

Why is the position of your claim so important?

As you can see in this map:

- Claim 1, is in **all 4 quarter sections**.
- Claim 2, is in the **NE1/4, SW1/4 & SE1/4**.
- Claim 3, is in the **NE1/4 & SE1/4**.

All 3 have the same tie in data. All 3 have the same dimensions.

North Azimuth...

Quadrant and Bearing...

- expressed as N 45° W.

- expressed as N 30° E.

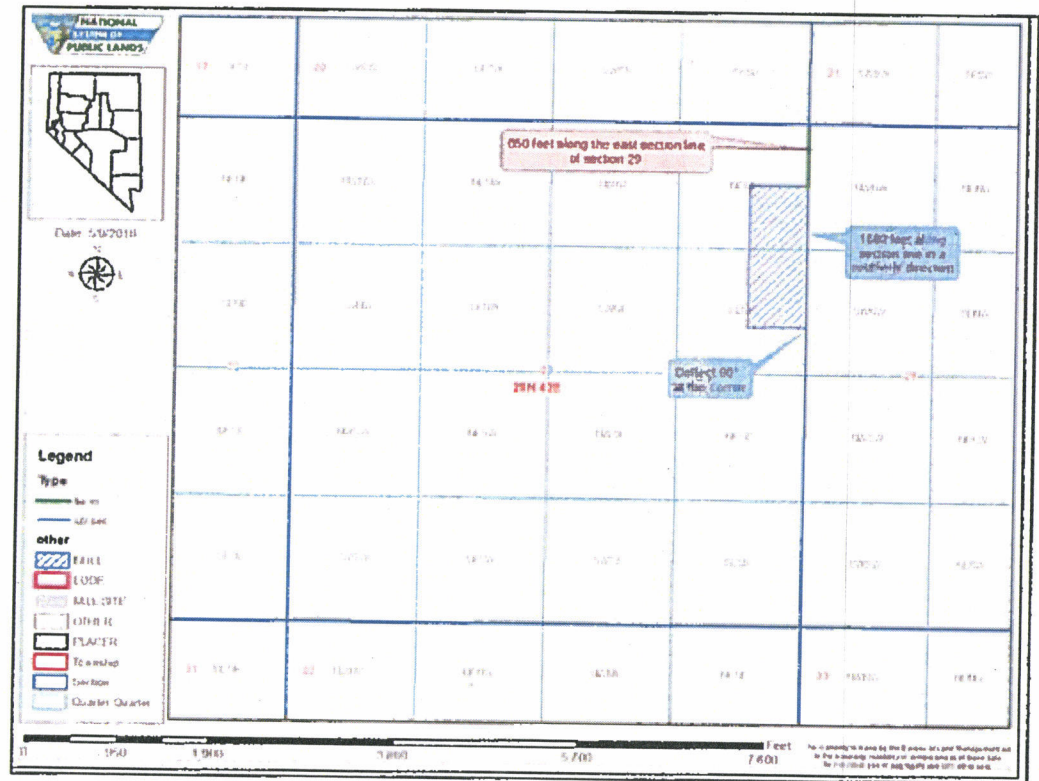

- expressed as either N 90° E or S 90° E.

- expressed as S 60° W.

information.

- At the SE corner of the claim, deflect 90° and go 600 feet to the SW corner.

Let's start with the compass.

North, South, East, and West are always easiest.

You could record the direction like this, ***“the NW corner of my claim is 550 feet south and 1200 feet east of the NW corner of section 20, T32N, R50E”.***

With this method, no angles or degrees are needed!
And we assume you mean “True” North.

Alternative tie in points:

- 43 CFR 3832.12 When I record a mining claim or site, how do I describe the lands I have claimed?
(2)(i)(B)...tying the description to a:
 - Natural object,
 - Permanent monument,
 - Topographic,
 - Hydrographic, or
 - Man-made feature.

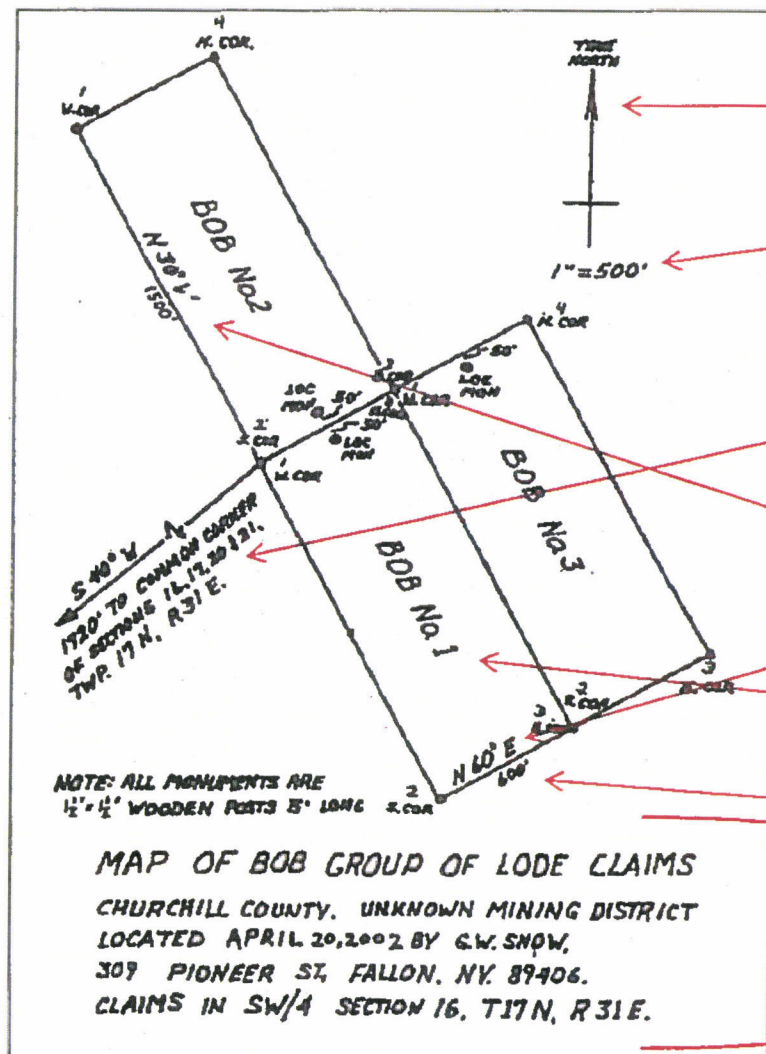

Metes and Bounds: (note: this is after providing a tie in to the Northwest corner of the claim.)

*Commonly used
with lode claims*

- Beginning at the Northwest corner,
- go 600 feet in a S 70° E direction to the Northeast corner,
- thence 1500 feet in a S 20° W direction to the Southeast corner,
- thence 600 feet in a N 70° W direction to the Southwest corner,
- thence 1500 feet in a N 20° E direction to the Northwest corner and point of beginning.

An example of a simple accurate map.

North arrow

scale

Tie in: 1720' in a S 40° W direction to the common corner of sections 16, 17, 20, 21

Orientation of the claims: N 60° E and N 30° W.
