### Mining Claim Location Notice(s) – Amendment(s) Required

Pursuant to Title 43 Code of Federal Regulations (CFR) 3832.1, the Bureau of Land Management (BLM), Arizona State Office, received your notices of location for recording mining claims. In accordance with 43 CFR 3832.12, the claims listed above cannot be accepted as filed and must be amended as noted below.

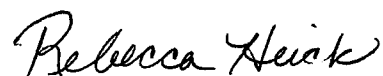

1. AMC430380 and AMC435500 do not include a tie to a permanent monument.
2. AMC430380 is described as being adjacent to patented mining claim 2034 Lead King on the east and patented mining claim 2402 Winnebago Chief on the north. These patented claims lie mostly in T. 24 S., R. 16 E., sec. 3 and slightly in T. 24 S., R. 16 E., sec. 10. Your description and map drawing depict AMC430380 as being mostly in T. 24 S., R. 16 E., sec. 10, with a very small portion contained in T. 24 S., R. 16 E., sec. 3.
3. AMC435500 is described as being adjacent to patented mining claim 2402 on the north and AMC43030 on the east. There are three patented mining claims 2402. These patented claims lie in T. 24 S., R. 16 E., sec. 3. Your description and map drawing depict AMC430380 as being in T. 24 S., R. 16 E., sec. 10. Based on where the patented mining claims are and where AMC430380 appears to be, AMC435500 would lie in T. 24 S., R. 16 E., sec. 3 and sec. 10.
4. A copy of the Master Title Plat and Mining District map is included for your reference.

In accordance with 43 CFR 3832.12 a lode claim must be described by metes and bounds and include a tie to a permanent monument such as a section quarter corner monument. All claim

descriptions must include state, meridian, township, range, section and by aliquot part to the quarter section.

An amendment must be filed for each claim listed above to correct the defects identified. There is a \$10 BLM processing fee for each amendment. The amendments must be received by BLM within 30 days of your receipt of this notice. If the amendments are not received within the 30 day timeframe the mining claims will be declared null and void.

If additional information is required, please contact RéAnn Myers at 602-417-9413. Please include your AMC serial number(s) on all correspondence.

2016 - 2021 Mining operations 3715.2 (a, b, c, d, e) Production with concurrent reclamation.

Reasonably incident. Substantial regular work, full time production. Extraction and recovery reasonably substantiated.

Activity verifiable. Appropriate equipment use consistent with "no significant impact".

Access via existing FS roads, old mine roads, trails. No new roads proposed.

\* Amend entry 3715.2-1(e) [add]: FS roads recently repaired and graded, so claimant, operators and workers improved access

to worksites facilitates full shifts of usual and customary length.

\* Amend entry 3715.3-2 (d) [strike & change to]: Enclosures, fences, gates, or signs intended to exclude the general public

are limited to hazard warnings and postings immediate to the workings, old mine shafts or other such pre-existing dangers

for practical safety and liability considerations.

**New NOI 2016.txt**

**\* Amend 3715.3-2 (f) [add]: Small producing excavations and tunnels from which mineral specimens are being extracted using only hand tools are very amenable to concurrent reclamation. Seasonal heavy rains' potential erosion can best be prevented by prudent use of equipment to control excavated materials, and to make restoration cost-effective & timely. Ore production involves similar small-scale excavations and tunnels, all of which, cumulative of all mining operations on all the listed claims, is less than five acres, and which ores are hand-extracted for immediate sorting & grading.**

**Earthmoving equipment is to be applied primarily for recovery and storage of soil, rock, and excavated volumes, erosion control, contour restoration and reclamation, and post-monsoon road and trail maintenance. Minor use is to directly facilitate safe working conditions during production.**

**This Notice addresses (1) commercial production underway at the above listed unpatented mining claims,  
(2) the use of equipment in the "no significant impact" level operations to effectively achieve erosion prevention & control and to facilitate successful reclamation as well as to maintain safe workings.**
