Chains Applicant for listing, Charles McFarland; Application No. 171, dated April 7, 1909; List No. 3-363, dated November 24, 1909; H. E. No. 022295, made by Charles McFarland at Phoenix, Arizona, on May 1, 1913.

Surveyed under special instructions from the Surveyor General for Arizona dated November 8, 1913, and designated as Homestead Entry Survey No. 123.

Listed under the Act of June 11, 1906 and survey authorized by the Acts of June 11, 1906 and March 4, 1913.

This survey is located in secs. 27 and 28, unsurveyed T. 11 N., R. 10 E., of the Gila and Salt River Base and Meridian, within the Tonto National Forest, Arizona.

Survey commenced January 17, 1914 and executed with a W. and L. E. Gurley light mountain transit with vertical circle and Burt solar attachment, the least count of all arcs being one minute.

The distances were measured with a 200 link steel tape directly on the slope and the slope angles determined with a clinometer.

The courses of this survey were deflected from the true meridian as determined by direct solar observation: January 20, 1914. At 9h. 40m. a.m., l.m.t., at a point on line 1-2 N. 64° 22' W., 31.00 chs. from cor. No. 1 obs. sun for azimuth as follows:

Description

This claim lies in two shallow draws, one of which has
 a northwesterly course and the other a southeasterly
 course. The greater part of the claim is open land
 with a slope toward the two principal arroyos. The
 portions of the claim along the boundary lines is heavi-
 ly covered with oak brush, and small timber, as cedar,
 juniper, and oak.

Practically no timber of commercial value on claim.

No water has been found on claim, the two wells both being
 dry. Water for domestic purposes is hauled from spring
 west of claim. The natural rainfall is depended upon
 to raise crops.

Chains The land is more valuable for agricultural purposes than any other and the greater part of it can be so used. Claimant has approximately 31 acres under cultivation, on which good crops of corn, barley, etc. are raised. An outcropping of quartz is observed on the eastern part of claim just east of the road, but does not show mineralization to the eye and it is stated by claimant that no mineralization is known in this ledge. The outcropping does not show at any other point on claim. No other indication of mineralization observed or known.

Conflicts and Adjoining Claims.

No officially surveyed claims or others adjoining or nearby.

Payson, Arizona, the nearest settlement and postoffice is about 2 miles southerly and is reached by a good wagon road.

Survey completed January 21, 1914.

DIRECTIONS.—1. Carry out calculations to two decimals only.

2. In balancing Latitudes and Departures do not obliterate or change the original figures.

Put the corrected figure or figures above in red ink. Do not change the footing of the original figures, but put below them the corrected footing in red ink.

The corrections for balancing fallings should be proportional to the lengths of the lines.

3. In calculations of fallings take result to nearest link. In calculations of N. and S. areas drop all after second decimal. Surveyors are required to use the Standard Field Tables issued by the G. L. O.

4. Only three copies of this tabulation are necessary, for the District Office, the Surveyor General, and the Commissioner.
