General Description

The Bradshaw Mine is situated upon the east side of the San Pedro river, about one, and one half miles from the village of Charleston, in a southeasterly direction; and about seven, ^{and} one half miles southwesterly from the City of Tombstone, Pima Co - Arizona, Territory.

Its surface is rough and much broken, being situated on a line of rolling hills.

The improvements made upon this mine, by the Claimants consist of seven shafts and one Incline. Incline No 6 ^{and} shafts 7 and 8, as shown upon the plat, belong to the

(continued)

"Washington Mine" as it was located prior to the Bradshaw, and covers said Decline, and shafts, they being upon the conflicting ground, as shown by the accompanying map.

Shaft No 1. is the main working shaft and has been sunk to a depth of 240 feet at the present date, and at the 75 foot level, there is a large station from which a drift has been run N. E. upon this claim for a distance of 40 feet. The West end line of Bradshaw runs through the centre of shaft.

A frame building, covers this shaft, (as well as the machinery which is used for working the Mine) and is 30' x 70 feet upon the surface of the ground, about half of which is upon the Bradshaw, as originally located.

Shaft No 2 is 6 feet deep

Shaft No 3 - is 30 feet deep

Shaft No 4. is 4 feet deep

Shaft No 5. is 12 feet deep.

The houses shown upon the plat were built by the claimants, for the accommodation of the men employed upon the mine.

The north half of this Mine as shown by the monuments

(concluded)

is upon, and covers the south
Gulf of the "Washington Mine"
owing to a mistake made
by the Locators, which mistake
failed to be remedied, when the
amended Location notice was
filed for record.

The "Washington Mine"
was Located Jan 1st 1879,
and The "Bradshaw Mine" upon
the 17th day of Jan'y 1879.

consequently the "Washington"
is the prior Location, but as
both properties are owned by
the same persons, there will be
no cause for any adverse
claims to the ground in conflict.
