The Field Notes Survey of the

Antewener Mining Claim,  
Doubstone District, Pima Co.,  
A.D.

Survey commenced Feb. 10, 1881.  
Survey completed Feb. 11, 1881.

By comparison with the U. S.  
Standard Meridian established  
in Doubstone District, I find  
the variation of the needle of  
my instrument to be  $11^{\circ}.15' E.$

Commencing at the initial  
monument of the claim, as per  
notice of location, where I set  
a stake  $4 \times 4$  ins., 5 ft. long in  
a monument of stones, and  
mark them I.M., I.M.C. <sup>N<sup>o</sup> 1.</sup>, and  
from which

U. S. M. M. No. 1 bears  $S. 14^{\circ} E.$   
A shaft  $6 \times 8$  ft., 11 ft. deep, bears  $S. 11^{\circ}.20' W. 378$   
ft. dist.

A shaft  $6 \times 8$  ft., 10 ft. deep, bears  $S. 12^{\circ} W., 341$  ft.  
" "  $6 \times 8$  " " " " "  $S. 13^{\circ} W., 92$  "  
" "  $5 \times 7$  " " " " "  $S. 42^{\circ} W., 87$  "

I run thence, as per location  
notice,  
 $N. 85^{\circ}.50' E.$

$va. 11^{\circ}.15' E.$

405 To N. end centre monument  
of claim on West boundary  
line of the Doughnut claim,  
Sov N. 41, where I set a  
stake  $4 \times 4$  ins., 5 ft. long in a  
monument of stones, and marked  
I. M. C. N<sup>o</sup> 2.

Being on the west line of the  
Doughnut claim I carefully  
adjust my instrument, and  
find the course of said line  
from monument to monument

Feet

to be  $N. 48^{\circ}. 55' W.$ , and  $S. 48^{\circ}. 55' E.$   
and from the certified copy of  
said line furnished by my  
guidance I see that the of-  
ficial survey of the Toughnut  
claim has the same line at  
 $N. 48^{\circ}. 8' W.$  &c. the difference  
being caused by the instruments

Therefore I run  
 $N. 48^{\circ}. 55' W.$

$ra. 11^{\circ}. 15' E.$

300 Along north end line of Intermene  
and west side line of Toughnut.  
To N.W. corner of claim where  
I set a stake  $4 \times 4$  ins. 5 ft. long,  
marked I.M.C., N<sup>o</sup> 3, in a  
monument of stones. This is  
also the N.E. corner of the  
Defence claim.

Thence  
 $S. 52^{\circ}. 15' W.$

$ra. 11^{\circ}. 15' E.$

250 Along west side line of claim,  
and east side line of Defence ...  
450 1/2 Gulch drains W. N. W.

Stake in line in monument of  
stones, marked "Intermene" on  
east side, and "Defence" on west side.

1500 To S.W. corner of claim,  
where I set a stake  $4 \times 4$  ins.,  
5 ft. long, in monument of  
stones, marked I.M.C., N<sup>o</sup> 4.

Thence

## General Description:-

The Intewener Mining  
claim is situated in the  
Tombstone mining district,  
which is in that portion  
of Pima County made by a  
late act of the Arizona Leg-  
islature into Cochise County.

# General Description Intermine

## Mining Claim, Con.:-

but as said Cochise County has not yet been organized and the only legal records are those of Pima County, the survey is made to show the claim in said Pima County.

The claim lies directly in front of and about three-quarters of a mile distant south of the City of Tombstone and beyond the Tangle Hub mine. The main gulch coming down from the Centention hill passes through the claim and on either side of this gulch is rolling ground.

The work on the claim, as is indicated by the foregoing field notes consists of a number of prospect shafts, which were made by the grantors to the Intermine Gold and Silver Mining Company, claimant, with the exception of the shaft 4 x 6 ft., 13 ft. deep, marked in the notes as having been made by other parties, and thereby certify that the value of the work done and improvements made upon the claim by the claimant or its grantors exceeds in value the sum of five hundred dollars.

Henry G. Howe,  
U. S. Deputy Surveyor  
of Mineral Lands.
