Official Survey of the Metallic Accident Mine

Claimed by Henry C. Hilson and
Stephen Smith, situate in Hallapai
Mining District, County of Mohave
Territory of Arizona

The survey has been executed
with a Heller and Brightley Transit
(Philadelphia make)

I determined the true meridian
by equal shadows of the sun, making
my observations at the time of the
summer Solstice, June 21st 1883 and
obtained fourteen (14) degrees and twenty five
(25) minutes east as the variation

The survey and the location de-
scribed in the certified copy of record
of location are identical

The improvements made by appli-
cants for survey and by their grantors
consist of a shallow shaft or main lode
known as the discovery shaft, also
one shaft on spur sixty five (65) feet deep

The vein on said spur has been stoped
on both sides, from the bottom to
near surface, for a distance of
50 feet more or less on either side

From the foot of the hill, a tun-
nel two hundred and fourteen (214)
feet long, connects with the main
lode, on which a cross tunnel
ten (10) feet long, shows same char-
acter of ore, as discovery shaft

The value of the labor and improve-
ments upon the Metallic Accident Mine
placed thereon by the applicants and
their grantors is not less than five
hundred (500.) dollars.

Embracing a portion of section
thirteen (13) township no. 23 north of
Range no 18 West Gila and Salt
River Base and Meridian

Feet

Beginning at a Post two (2) by four (4) inches two and one half (2 1/2) feet high marked I in mound of stones on S end of centre of vein, from which Initial point of original location a stone monument and stake at discovery shaft on centre of vein bears N. 42° 40' W.
