Phoenix, Ariz., Dec. 12, 1898.

U. S. Surveyor General,
Tucson, Arizona.

Sir:

As per paragraph 49, page 22, Manual of Instructions for the Survey of the Mineral Lands of the United States, I would say, I have made a thorough examination as to survey 1131 made by me, which is joined by surveys 1294 and 1295, made by J. C. Dobbins, U. S. Dpty. Mineral Surveyor, and I found courses and distances to be correct as reported by J. C. Dobbins.

As to my error in course, I turned my variation in the opposite direction and as a result made an error of twice the correct variation.

Respectfully submitted,

(Signed). Frank Nicholson,

Phoenix, Ariz., Dec. 12, 1898.

U. S. Surveyor General,
Tucson, Arizona.

Sir:

As per paragraph 49, page 22, Manual of Instructions for the Survey of the Mineral Lands of the United States, I will say that I have made a thorough examination as to the survey 1131 made by Mr. Frank Nicholson, Deputy Mineral Surveyor, which survey is joined by surveys 1294 and 1295 made by me, and on joint investigation made by Mr. Nicholson and myself we find that the courses as reported by me in my report of these surveys, are correct.

Respectfully submitted,

(Signed). J. O. Dobbins,

U. S. Deputy Mineral Surveyor.

The cross cut is intended to tap the lower workings of the Portmanteau at a depth of 350 ft. to ventilate the mine so as to permit the driving

X

of the levels to tap the Lyon, Survey 1295, the Davis and Fairview of this survey.

Value, \$6320.

Other improvements:

Surveys No. 1294 and 1295, are made by The Nicholson Gold Mining Company, who are also the owners of the Portmanteau, Survey No. 1131. All work is designed to develop the entire group of six claims.

The greater amount of work for a general development on account of existing conditions has been done on the Portmanteau, which has some 3000 feet of underground work at present. All buildings on the property are on the Portmanteau ground, and consist of a frame kitchen and dining room, office, assay shop, a stone and lumber bunk house, frame blacksmith shop, frame stable, trails well built to the tunnels, and other workings, a wagon road of two and one half miles, a great part of which is a dug way grade. All improvements are well constructed.

INSTRUMENT.

This survey was made with a Gurley Engineers' transit. Courses were deflected from the true meridian, as determined by direct solar observation. The distances were measured by a 50 and 100 ft. steel chain.

Note. - I would most respectfully call the attention of the Surveyor General to the discrepancy between the courses of the lines of the Portmanteau, Survey 1131, in the original notes and the courses as I represent them as found on the ground. In tying on to the Portmanteau, 1131, with the Raven, Davis, Fairview and Legal Tender, of 1294, I fail to check with survey No. 1131 -
