Yavapai Co.
Arizona.

a The soil of this claim throughout its entire extent is composed of sand gravel and boulders washed down from surrounding mountains.

There is no timber and only scattering low brush and scant grass upon the surface.

b Antelope Creek that begins about three miles north easterly from the claim passes through and a little the west boundary line of the claim as shown upon the accompanying plat. It varies in width across the bottom from 30 to 80 feet and flows in a southerly direction.

c The markings consist of excavations along the generally east bank of Antelope and at times during the past fifteen years have struck a almost the entire length of the claim. By annual freshets these markings have from time to time been filled in by sand and gravel and some of them have been re-marked.

The location of the markings in which the owner depends for the expenditure of \$500⁰⁰ is shown upon page 7 of this report, and consist of a shaft properly timbered, sunk in gold bearing gravel - 4 x 6 + 50 feet in depth which shows cor. No. 3 hrs N. 33° E. 357 ft - Also excavations in the gravel bank of Antelope Creek near the north west cor of the claim from 20 to 30 feet in width and extending in a South 30° Easterly direction from the N.W. cor of same - which shows cor No 4 hrs S.E. 200 ft - 75 feet.

d The nearest center of trade is Congress Junction 8 miles west of Perry's store and P.O. shown on accompanying plat.

e The nearest lode deposit is the "Midnight" before described and there are other lode claims N. E and W. within a radius of 2 miles names unknown.

f This claim is well adapted for placer mining and water has been brought from higher up on Antelope Creek and used upon the grounds

for this purpose. During the wet portion of the season in every year there is ample water running in the creek to mark the claim.

g The claimant has sunk the 50 ft shaft described in this report and owns the water rights and ditch by which it is practicable to mark the entire property. The ditch extends up the creek in a generally northerly and north easterly direction for $\frac{1}{4}$ mile or more.

h The true situation of all mines are reported above and there are no salt licks, salt springs or mill sites in the vicinity known to me.

OATH OF U. S. DEPUTY MINERAL SURVEYOR

Under General Land Office Circular "N" of September 23, 1882.

I, R. C. Powers, U. S. Deputy Mineral Surveyor, do solemnly swear that in pursuance of an order received from the U. S. Surveyor General for Arizona, dated Oct. 19, 1899 1899, I have made, under the provisions of General Land Office Circular "N," approved September 23, 1882, a personal and thorough examination, upon the premises, of the placer mining claim of Lilian Upwin known as the Lilian Placer situate in Wheeler Mining District, Yavapai County, Arizona, embracing 19.97 acres of alluvial ground - sand gravel and boulders to a depth of 20 to 30 feet or more. no timber; low bush. But top of Creek carries sufficient water for mining purposes most part of the year, and water has been carried through ditches on to the claim. Located in Township No. 10 N. Range No. 5 W. and that my report of such examination, hereto attached, is specific and in detail, and is a full and true statement of the facts upon all the points specified in said Circular.
