Instrument

This survey was made with a Gurley Light Mountain Transit. The courses were deflected from the true meridian as determined by direct solar observations. The distances were measured with a 50 ft. steel chain.

Before commencing this survey the instrument was tested on a meridian established at Prescott, Ariz and found to be in adjustment.

Location.

This group of mines is situated in the Black Hills Mining District Yavapai County Arizona, on unsurveyed land approximately in what will be T.p. 13 N. R. 3 W. when surveyed.
