### Course of Ledge

This ledge is almost all covered  
by the wash from the hill above  
but from the development work  
that has been done I believe  
the ledge to run the entire length  
of the Mc Coy Tip Top No 2, Tip Top  
and Wild & Woolly claims and I  
further believe that it follows  
as near as can be determined the center

line of each of said locations

Course and Direction of Edge

From the development work I believe this ledge runs South  $52^{\circ}$  West but being covered excepting where it has been exposed by development work the length is not very definitely determined and it would be impossible for me to certify to any greater length than what is exposed on the surface about 25 feet but the presumed course of the ledge is ~~throughout the entire center of the claim~~ from the N.E.C. to the S.E.C.
