 conveyed to the highest point of the claim.

It is connected with a Water Works System
 which conveys water from very large springs
 near the head of Big Bug creek, about 900 ft
 in altitude above and 7 miles distant from
 this claim. The water is conveyed therefrom
 by 6, 5 and 4 inch pipes to a reservoir located
 about 2 1/2 miles from this claim in a North
 Westerly direction. From the Reservoir it is
 conveyed by 3 inch pipe to the North West
 boundary of Sur N^o 1263 and thence by 2 1/2
 inch pipe to this claim.

The pipe on this claim is owned by the
 claimant, and is for the development of all
 the locations.

d The nearest post office is Mayer, a
 village of possibly 100 inhabitants and is
 located on Big Bug creek about 1000 ft North
 Westerly from this claim. The nearest
 railroad station is called Mayer and is
 located within the boundaries of the Winneford
 Placer as located.

e There are no lode deposits nearer than
 1 mile from this claim.

f This claim is peculiarly adapted for
 Placer mining inasmuch as the contours of
 the surface and the character and nature
 of the soil are such that it can be
 advantageously and cheaply worked and

The tailings be rapidly and easily disposed of.

During part of the year Big Bug creek carries an abundance of water for sluicing and all the year there is an abundance for working rocks

g The works and expenditures made by the claimant for the development of the claim consist of the cuts, shafts, ditch and water pipe described under paragraph "c" of this report.

h There are no mines, salt licks, salt springs or mill seats upon this claim

The survey was made upon the ground as described in the field notes

I found the connection from Cor N^o 1-1263 Polygon Placer, identical with Cor N^o 1 Sur N^o 1798 Winneford Placer to be S 23° 18' E. 1370.45 ft instead of S. 23° 18' E 1385. ft as given in Sur N^o 1263

I found Line 1-2 Sur N^o 1263 Polygon Placer identical with line 1-2 Winneford placer of this survey to be N. 54° 28' W. 896.4 ft instead of N. 54° 07' W 897. ft as given in Sur N^o 1263.

Mr Fisher the Deputy who made Survey N^o 1263 wrote me that his measurements were made with a 100 ft tape by such assistants as he could employ on the ground

While made with a 500 ft steel tape taking vertical angles and calculating the horizontal distances

One of the vertical angles going up Winneford peak to the U.S. L. M. was 17° 25'
