Instrument

This survey was made, with a
Reger Sixt Mountain Transit.

The courses were deflected from
the true Meridian, as determined
by Polaris observations.

The distances were measured with,
500, 200 & 50 ft. steel tapes.

Note,

The discrepancies between these field
notes and the location certificates of
the Big Rock and Rocky Flat Places,
with regard to the course and
length of the boundary lines are
due to errors in the latter.
