The Distances were measured with a 500 ft steel tape.

Survey No 1945

Note- The disagreement between these field notes and the location certificates are due to errors in the latter.

The bodies of the respective locations embraced in this survey, coincide with the center of the locations and equal them in length.

Note:- No work is given as the discovery work of the San Jose as in the original location no work was called for by the notice.

All lines of other claims were found upon the ground by monuments with proper markings, with the exception of Line 1-2 Black Diamond Survey 1733. Corner No 1, is a small oak stake marked B.D 1733 set in a mound of stone.

Corner No 2 is a 4th x 6th in post set in place at the west end of a porphyry boulder. Scribed B.D P.I 1733.

Note- The disagreement between this survey and adjoining officials surveys, is due to errors in the latter.
