DEPARTMENT OF THE INTERIOR.

OFFICE OF THE U. S. SURVEYOR-GENERAL.

oOo

I, Frank S. Ingalls, U.S. Surveyor-General for the District of Arizona, hereby certify that the official survey of the Error claim, designated as Mineral Survey No. 1968, situated in the Warren Mining District, Cochise County, Arizona, does not represent the conflicts called for in this survey with adjoining surveyed claims, as the said conflicts actually exist from the monuments of the conflicting claim as actually staked upon the ground, but shows an apparent location of a strip of ground, surveyed as the Error claim, which appears to exist owing to the discrepancy in the measurements called for in Mineral Survey No. 1780, Julia lode, 1562 Waddell lode, 1644 Primrose lode, and 1659 Wayland lode, and the monuments of these claims as they actually exist upon the ground. Considering the said Julia, Wayland, Primrose and Wayland lodes as they are actually marked and defined upon the ground, the Error lode does not exist. I also certify that no portion of Shaft No.2, credited to the Error claim, has been credited for the improvement upon any other survey.

Mineral Survey No. 1968.
Error Mining Claim.

14

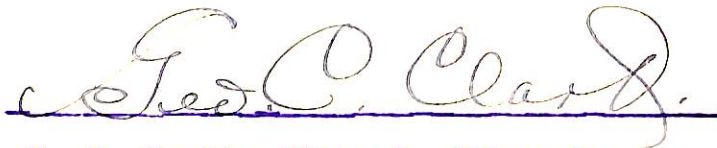

Junction Development Company, owner, all situated in the Warren Mining District, Cochise County, Territory of Arizona.

I hereby certify that the conflicts reported in my survey of the Error lode, Survey No. 1968, were not conflicts actually existing upon the ground by the monuments of the adjoining and conflicting surveyed claims.

Between the Wayland lode, Survey No. 1659, and the Julia lode, Survey No. 1780; between the Wayland lode and the Waddell lode, Survey No. 1562; and between the Primrose lode, Survey No. 1644, and the Waddell lode, no vacant ground exists, according to the monuments. As the monuments exist upon the ground the Wayland and the Julia have a common boundary as have also the Wayland and Waddell, and Primrose and Waddell.

The Error lode, Survey No. 1968, is claimed to exist by reason of the fact that the courses and distances of the official survey of the Wayland lode, Survey No. 1659, and of the Primrose lode, Survey No. 1644, when retraced on the ground left the space comprised within the boundaries of the Error lode.

I also certify that no portion of Shaft No. 2 of the Error claim has been accredited to any other survey.

U. S. Deputy Mineral Surveyor.

This diagram is to give locator a general idea of plan of location under the new law. The Discovery Shaft can be in the center of claim or any distance from either end desired. In the diagram it is placed 500 feet from one end and 1000 feet from the other. Commence description of claim at a center end monument, giving its distance and direction from center of Discovery Shaft; thence bound the claim in either direction. In description be careful to state locality of claim with reference to some natural object, or permanent monument, as will identify the claim.
