There are two other shafts on this claim with underground workings, which with the discovery shaft are to constitute one system of workings for the common improvement of all the claims embraced in this survey as well as the Roselona lode to be designated as survey No. 2396, and anundivided 1/9 interest in said common improvement is therefore to be credited to each of the claims of this survey and the Roselona lode, Before the expiration of the period of publication I will make a supplemental report showing in detail the character of said improvements and the manner in which they are for the common benefit of all the claims, and make the proper credits to each claim.

Location.

This claim is located in the Pioneer Mining District, Pinal County, Arizona, in approximately Tp. 4 S. R.13 E. unsurveyed.

Instrument.

This survey was made with a Buff & Berger 6¼ inch Engineer's transit with solar attachment. The courses were deflected from the true meridian as determined by Polaris and direct Solar observations. The distances were measured with a 150 and 300 foot steel tapes.

E. T. Stewart

U. S. Deputy Mineral Surveyor

Supplemental report of improvements made prior to the expiration of the period of publication of application for patent upon the claims embraced in Mineral Survey No.2395.

**********

I hereby certify that the value of the labor and improvements upon or for the claims embraced in Mineral Survey No. 2395 is not less than $500.00 for each location and that said improvements consist of, in addition to what was reported at the time of the survey,

Eureka No. 4 lode.
No. 2 shaft, 4x6x93 ft., partially timbered, which bears from cor. No. 1, S. 62° 46' W. 700 ft.

Value----------$1000.00

No.3 shaft the collar of which bears from cor. No. 1, S. 59° 45' W., 598.8 ft., shaft 4x6 ft., 155 ft. deep, incline 80°, dip N. 01° 00' E., all timbered. From the 75 ft. level, there is a drift, running N. 82° 48' E., 50 ft., thence N. 76° 48' E., 58 ft. to breast from the point in this drift, 50 ft. from the shaft, there is a cross cut running N. 13° 52' E. 24 ft. From the 75 ft. level, there is another drift running S. 84° 40' W., 36.3 ft. thence S. 29° 30' W., 24.1 ft., thence S. 87° 17' W., 59 ft. to connection with shaft No. 2, thence S. 80° 57' W., 21.5 ft.

Total value of shafts, drifts, and crosscut----$3000.00

It is the intention of the claimant company to continue the underground workings in shaft No. 3 westerly through the Hector lode and into the Cactus lode connecting with with shaft No. 1 on the Eureka No. 4 lode and to cross cut into the Vanity Fair, None Such, and Summit Wells lodes; also to continue the drift easterly through the Addie and into the Sunlight lodes; and to crosscut from the Addie lode into the Roselona lode, Mineral Survey No. 2396, claimed by applicant herein. By this system, shafts Nos. 1-2-3 on the Eureka No. 4 lode will form the basis of a system of underground workings by which the Eureka No. 4 None Such, Summit Wells, Hector, Vanity Fair, Cactus, Addie, and Sunlight lodes of this survey, and the Roselona

lode of Survey No. 2396 can be most economically and advantageously developed and a 1/9th interest of the value of said shafts is credited to each of said claims.

Total value of shafts Nos. 1-2-3 on the Eureka No. 4 lode is $5500.00 and a 1/9th interest, or $611.11, is credited to each of said claims, leaving the improvements upon or for each claim of this survey as follows:-
