Instuments.

Survey was made with a C.L. Berger & Son Transit. The courses were deflected from the true meridian as determined by observations on Polaris and the Sun. The distances were measured with a 350' steel tape.  
 NOTE:- The disagreement in the bearing of the north end of the 2nd. N. Ex. Grey Eagle cannot be accounted for.  
 NOTE :- The disagreement in the tie lines of this survey and the Apache Panther survey, must be due to an error in the length of the Apache Panther Lode.  
 This survey was tied into the nearest section corner that could be found in place.
