INSTRUMENT.

This survey was made with a Young & Sons' mountain transit (No.6855), provided with a Smith solar attachment.

The courses were deflected from true meridian as determined by direct solar observations; the distances were measured with 500 and 50 ft. steel tapes.

Note: Any discrepancies between the courses and distances of this survey and those of contiguous or adjoining surveys are due to discrepancies in the latter.

Amended notice of the Mollie and Anita Mining Claims. Notice is hereby given, that whereas, on March 23rd 1899, J. K. Volkert located the Mollie mine and mining claim, and the Anita mine and mining claim, situated in Silverbell Mining District, Pima County, Arizona, the location notices of which are recorded respectively in Book G. G. pages 334-5, Pima County Records of Mining Claims; and said claims lie side by side of each other; and whereas, the undersigned,

The Imperial Copper Company, a corporation organized and existing under the laws of the Territory of Arizona, is now the owner of said two claims; and whereas, each of said claims as actually surveyed and monumented contains a less amount of ground than is required for a full claim, and the two combined do not constitute a greater amount of mining ground than is allowed by law to be located for a full claim; and whereas, there has been discovered in addition to the veins and lodes heretofore discovered in said ground, another vein or lode which runs along and through the center of said two locations, lengthwise, as herein described. Now, in order to consolidate the two claims into one, and thereby save the expense of doing assessment work on both of said claims, and for the purpose of patenting the two consolidated and combined as one

claims, the undersigned, The Imperial Copper Company, a corporation as aforesaid, does hereby amend the location notices of said claims, and consolidate, combine and unite them into one, and as consolidated and united do hereby adopt the name of the Mollie Mining claim and drop the name of the Anita.

The length of this claim so consolidated is 1500 feet, and the said Company does hereby claim 565 feet in a Westerly direction and 935 feet in an Easterly direction from the center of the discovery shaft, at which this amended notice is posted, lengthwise of the claim, together with 300 feet in width of the surface grounds, on each side of the center line of said claim.

The general course of the lode deposit and premises is from the West to the East.

The claim is situated and located in the Silver Bell mining District, Pima County, in the Territory of Arizona, and adjoins the Herbert, Black Daisy, and Emerald and Prospector lode claims surveys respectively Nos. 1815, 1988, and 1818. From the N.W. Cor. U. S. Mineral Monument No. 1 of this District bears N. 64 deg. 31' W. 1716 feet. An Act to Codify and Revise the Laws of the Territory of Arizona

SECTIONS I-II.-INC. LOCATION OF CLAIMS

Be it enacted by the Legislative Assembly of the Territory of Arizona:

SECTION 1. On the discovery of mineral in places on the public domain of the United States, the same may be located as a mineral claim by the discoverer for himself, for himself and others, or for others.

SECTION 2. Such location shall be made by erecting at or contiguous to the point of discovery, a conspicuous monument of stones not less than three (3) feet in height, or an upright post securely fixed, projecting at least four (4) feet above the ground, in which monument of stones or on which post, there shall be posted a location notice, which shall be signed by the name or names of the locator or locators. The location notice must contain: First, the name of the claim located; second, the name or names of the locators; third, the date of the location; fourth, the length and width of the claim in feet and the distance in feet from the point of discovery to each end of the claim; fifth, the general course of the claim; sixth, the locality of the claim with reference to some natural object or permanent monument whereby the claim can be identified.

SECTION 3. Until each and all of the above specified things shall have been done no right thereto shall be acquired.

SECTION 4. From the time of the location of a mining claim as above specified, the locator shall be allowed ninety (90) days within which to do or cause to be done, the following things: First, to cause to be recorded in the office of the County Recorder of the county in which the claim is situated, a copy of the location notice; second, to sink a discovery shaft in the claim to the depth of at least ten (10) feet from the lowest part of the rim of the shaft at the surface, and deeper if necessary until there is discovered in said shaft mineral in place; third, to monument the claim on the ground so that its boundaries can be readily traced.

SECTION 5. The failure to do all the things enumerated in this section in the time and space specified shall be construed into an abandoning of the claim, and all right thereto of the discoverer and locator shall be forfeited.

SECTION 6. Such surface boundaries shall be marked by six (6) substantial posts projecting at least four (4) feet above the surface of the ground, or by substantial stone monuments at least three (3) feet high, to-wit: One at each corner of said claim, and one at the center of each end line thereof.

SECTION 7. Any open-cut, adit or tunnel which shall be made as above provided for as a part of the location of a lode mineral claim, and which shall be equal in amount of work to a shaft ten (10) feet deep and four (4) feet wide by six (6) feet long, and which shall cut the lode or mineral in place at a depth of ten (10) feet from the surface, shall be equivalent as a discovery work to a shaft sunk from the surface.

SECTION 8. Location notice may be amended at any time, and the monument changed to correspond with the amended location; provided, that no change shall be made that will interfere with the rights of others.

SECTION 9. The amount of assessment or representation work or improvements to be done or made during each year, after the completion of the location as heretofore provided, and the time for doing the same shall be as provided by the laws of the United States.

SECTION 10. Within three (3) months after the expiration of the period of the time fixed for the performance of annual labor, or the making of such improvements upon any mining claim, the person on whose behalf such work or improvements was made, or some person for him knowing the facts, may make a record in the office of the County Recorder of the county wherein such claim is situated, an affidavit in substance as follows:

TERRITORY OF ARIZONA, }
 } ss.
 being duly sworn deposes and says that he is a citizen of the United States and more than twenty-one years of age, resides at County, Arizona, Territory, and is personally acquainted with the mining claim known as Mining District, Arizona, Territory, the location notice of which is recorded in the office of the County Recorder of said County, in book of Records of Mines, at page That between the day of A. D. and the day of A. D. at least dollars worth of work and improvements were done and performed upon said claim, not including the location work of said claim. Such work and improvements were made by and at the expense of owners of said claim, for the purpose of complying with the laws of the United States, pertaining to assessments of annual work, and (here name the owners of men who worked upon the claim in doing the work) were the men employed by said owner, and who labored upon said claim, did said work and improvements, the same being as follows, to-wit: (Here describe the work done).

SECTION 11. Such affidavit, when so recorded, shall be prima facie evidence of the performance of such labor or the making of such improvements, and said original affidavit, after it has been recorded, or a certified copy of record of same, or the record of same, shall be received as evidence accordingly by the courts of the Territory. The relocation of forfeited or abandoned lode claims shall only be made by sinking a new discovery shaft and fixing the boundary in the same manner and to the same extent as is required in making an original location; or the locator may sink the original discovery shaft ten (10) feet deeper than it was at the commencement of such location, and shall erect new, or make the old monuments the same as originally required. In either case a new location monument shall be erected, and the location notice shall state if the whole or any part of the new location is located as abandoned property, else it shall be void.

The above diagram is to give the locator a general idea of the plan of location under new law. Your discovery shaft may be in the center of claim, or any distance from either end you desire. In the diagram we have placed it 500 feet from one end and 1000 feet from the other. In description, be careful to state locality of claim with reference to some natural object, or permanent monument, so as to identify the claim.

U. S. SURVEYOR-GENERAL'S FINAL CERTIFICATE ON FIELD NOTES.

Department of the Interior,

OFFICE OF U. S. SURVEYOR-GENERAL,

Phoenix, Arizona,

October 25, 1907.

I, U. S. Surveyor-General for District of Arizona
do hereby certify that the foregoing transcript of the Field Notes, return and approval of the survey
of the mining claim of
The Imperial Copper Co.
known as the MOLLIE and MURRAY
situate in Silver Bell
Mining District, Pima County, Arizona
in Section Approx., Township No. 12 S., Range No. 8 E., Unsur., and
designated as Survey No. 2437, has been correctly copied from the originals on file in
this office; that said Field Notes furnish such an accurate description of said mining claim as will, if
incorporated into a patent, serve fully to identify the premises, and that such reference is made therein
to natural objects or permanent monuments as will perpetuate and fix the locus thereof.

And I further certify that five hundred dollars' worth of labor has been expended or improve-
each of
ments made upon said mining claim by claimant or its grantors, and that said improvements
consist of 8 cuts, 5 tunnels, 4 shafts and 2 drifts, total value
\$2890.00

and that no portion of said labor or improvements has been included in the estimate of expenditures
upon any other claim.

I further certify that the plat thereof, filed in the U. S. Land Office at Phoenix,
Arizona is correct and in conformity with the foregoing Field Notes.

Frank S. Ingalls,

United States Surveyor-General for Arizona.
