INSTRUMENT

This survey was made with a Young & Son Light Mountain transit, with Smith solar attachment. The courses were deflected from the true meridian as determined with the solar attachment and checked on the lines of Surveys Nos. 1401, 2032 and 2033, which practically agree. The distances were measured with a one hundred foot steel tape.

NOTE: The bearings and distances given in the location notice of the Pride of the West No.2 Lode differ materially from the bearings and distances given in this survey, and the greater portion of this location has been absorbed by the New York Lode and Smuggler Lode, Survey No.2216.
