Note: The six lodes embraced in this claim comprise one  
contiguous group, which can be developed advantageously  
owing to the natural topography of the country by the  
No's 3, 4, 5 and 6 tunnels on the Ontario No. 5 lode as can  
be seen upon inspection of the accompanying map marked  
Contour Map Survey No. 3110, which is a part of these  
field notes.

The contours were taken from the U.S.G.S. topo-  
graphical sheet of the Clifton quadrangle. The said  
tunnels all bear to the Southwest and if they were  
produced would develop the lodes at a depth varying  
from 100 to 800 ft., thus they are an excellent common  
improvement, and an undivided 1/6 interest in the value of each of  
said improvements is accredited to each of the claims in this survey.

#### INSTRUMENT

This survey was made with a Buff&Berger light  
mountain transit. The courses were deflected from the  
true meridian as determined by Polaris observations.  
The distances were measured with 5, 50 and 500 ft. steel  
tapes.

#### ADJOINING LODES

This survey is bounded on the North by the Champion  
lode unsurveyed claimant unknown; Sur. No. 1867,  
Alaska and Artic lodes Shannon Copper Company claimant;

Company of Arizona claimant; on the East by  
 by the, South Dakota and Minnesota lodes, unsurveyed
