This shaft is sunk vertically 25 ft. from the surface; the balance of 95 ft. is sunk on a 70° incline the course of which is S. 43° W. From the bottom of the shaft a crosscut 4 x 6 ft. runs N. 48° W. 8 ft., whence face of drift 4 x 6 ft. bears S. 55° W. 10 ft., the face opposite bears N. 55° E. 12 ft.

Value of one-seventh interest credited to this claim \$285.71

No. 3 A shaft which from Cor. No. 3 bears N. 70° 30' W. 299 ft., 4 x 6 ft. x 10 ft. deep.

Value \$70.00

No. 4 A trench the east end of which from Cor. No. 3 bears N. 66° 30' W. 394 ft., 3 ft. wide, 3 ft. deep, running N. 80° W. 26 ft.

Value \$40.00

No. 5 A shaft which from Cor. No. 2 bears S. 20° E. 15 ft., 3 x 10 ft. x 5 ft. deep.

Value \$30.00

Note: An undivided one-seventh interest, value \$771.43 in shaft No. 6 on the Jaguar lode, is credited to this claim.

In order to thoroughly develop the entire claim in miner-like and efficient manner, the claimant proposes to sink improvements No. 6 on the Jaguar lode and No. 2 on the Dollie W. lode to greater depth and from appropriate points to drive drifts and crosscuts through and into each lode location of the claim. It is apparent that such a method is of economic importance. The surface ground of the entire claim is gently rolling ground for which reason efficient development can only be accomplished by sinking, crosscutting and drifting. The position of the said improvements is also such as to insure reasonable economy in attaining the object sought,

An undivided one-seventh interest in each of

SURVEY NO. 3157.

the said improvements, value \$771.43 and \$285.71 respectively, is therefore credited to each lode location of this claim.

OTHER IMPROVEMENTS.

None.

INSTRUMENT.

This survey was made with a C. L. Berger & Sons No. 4 transit. The courses were deflected from a meridian established from observing Polaris at elongation at Cor. No. 3 Paradise lode. The distances were measured with a Lufkin 660 ft. steel tape.
