An undivided $\frac{1}{5}$ interest is assigned to
 this claim Value \$14,970-

This shaft is a practicable and feasible
 main working shaft for the entire group,
 as, by an extension of the workings on the
 various levels, the entire group may be
 advantageously developed and ore extracted
 therefrom. This improvement is, therefore,
 a common improvement for the benefit
 of each ^{lode} claim of this group and a $\frac{1}{5}$ undivided
 interest of the total value of this improvement
 (\$14,970-) is properly accredited to each
 lode claim of the group. The surface of the
 claims is very rough and broken. The low
 point of the group is at cor. no. 1 Gold Crown
 no. 2 lode, being approximately 80 ft. below
 the collar of shaft no. 15, Gold Crown no. 2 lode.
 The high point is on the center line of the

Expenditure of five hundred dollars - continued.

Maine ~~No.~~ 2 lode 500 ft. from the north end center, being approximately 250 ft. above the collar of shaft no. 15, Gold Crown No. 2 lode. The bottom of this shaft, and each of the levels extending from the shaft, is below the surface of each claim of this group, making it possible to extend the workings and intersect the ore bodies lying under each claim.
