REPORT.

U.S.L.M. No. 3752 is a cross on quartzite in place, about which is chiseled U.S.L.M. 3752, with mound of stone alongside. The tie to this monument was made direct from Cor. No. 1 of Blue Mule No. 9 lode.

The disagreement between these notes and the location notices is due to error in the notices.

Edwin J. Stewart

United States Mineral Surveyor.

Globe, Arizona.

January 17, 1921.

In the execution of Mineral Survey No. 3732, I find that the claims are not within the two mile limit of an approved corner of the public survey or a U.S.L.M., so I established U.S.L.M. No. 3732.

There being neither a suitable post or stone available I selected a point on a hill which is visible for a great distance in all directions and chiseled a cross and U.S.L.M. 3732 on quartzite in place, and erected a monument of stone, 6 ft. base, 6 ft. high, $S.86^{\circ}E.$ 24.0 ft. therefrom, and took the following bearings:

An oak tree, 12 ins. in diameter, blazed and scribed cross B.T. U.S.L.M. 3732, bears $S.11^{\circ}-50'E.$ 42.95 ft.

An oak tree, 9 ins. in diameter, blazed and scribed cross B.T. 3732, bears $S.81^{\circ}-26'E.$ 44.2 ft.

A cross on quartzite in place, about which is chiseled B.R.U.S.L.M. 3732, bears $S.01^{\circ}-42'W.$ 14.1 ft.

The saddle of the Triplets Mountain bears $S.05^{\circ}-54'W.$

The center of the Bear Canyon Corral bears $S.46^{\circ}-00'W.$ 3730.0 ft.

As near as can be determined with the instrument used, this monument is in Latitude $33^{\circ}-33'$ North. The Longitude is approximately $110^{\circ}-25'$ West.

~~No topographical plat accompanies this report, as none could be prepared that would better show the location of this monument than the plat of Mineral Survey No. 3732 which shows Bear Canyon accurately, which, together with the tie to the Bear Canyon Corral, a well known land mark, definitely fixes the location of the monument.~~
