## Feet

Mineral Survey No. 4287 was made with a C. L. Berger & Sons precise transit, with horizontal limb 6.25 inches in diameter, having double opposite verniers, and full vertical circle 5 inches in diameter, having one double vernier; the verniers read to one minute of arc; the eye piece is equipped with a colored glass slide in a prismatic eye piece for making direct observations upon the sun. The instrument was in good condition at the time of survey and all adjustments were in good order. An a. m. altitude observation of the sun for azimuth, and at noon on the meridian for latitude, were made at Cor. No. 1 of the White Lily lode, the details of which observations are shown in the calculation sheets submitted herewith for examination. All azimuths in this record are referred to the true meridian thus determined, by the method of deflection angles and calculated courses.

The lines were measured with a Keuffel & Esser steel tape, 100 feet in length, graduated to feet, tenths and hundredths of feet for the entire length; a Keuffel & Esser steel tape, 300 feet in length, graduated to feet, tenths and hundredths of feet for the entire length; a Keuffel & Esser steel tape, 25 feet in length, graduated to feet, inches and fractions of inches for the entire length. All tapes were compared with a Keuffel & Esser standard tape at the time of beginning the survey and found correct.

All lines and connections of this survey were run by direct methods.

The magnetic variation observed at each corner of the survey gave a uniform value of  $12^{\circ} 45' E.$ ,

No. 2 A shaft, the center of which bears S. 26° 15' E., 320 ft. from the north end center of the Blue Bell lode; 4x6 ft. in size, 8 ft. deep  
Value \$50

No. 3 A shaft, the center of which bears S. 2° 10' W., 185 ft. from Cor. No. 4 of the Blue Bell lode; 6x8 ft. in size, 4 ft. deep  
Value \$50

## LOTUS BLOSSOM

No. 1 The discovery point of the Lotus Blossom lode is on the center line 230 ft. from the east end center. The discovery is a 10 inch quartz vein in the granite carrying values in gold and silver.

No. 2 A shaft, the center of which bears N. 88° 20' W., 772 ft. from the east end center of the Lotus Blossom lode; 4x12 ft. in size, 5 ft. deep  
Value \$100

No. 3 A shaft, the center of which bears N. 82° 50' W., 677 ft. from Cor. No. 2 of the Lotus Blossom lode; caved, said by claimant to be 4x6 ft. in size, 35 ft. deep  
Value \$500 (Claimant's value)

## COMMON IMPROVEMENTS.

Claimant has made improvements No. 1 and No. 3 of the White Lily lode as common improvements for this group of 5 contiguous claims. The surface of the ground rises from the east line of the claims to the west and from these two shafts drifts and cross cuts can be run to develop the ore deposits at depth on each of the claims. They are ideally situated as to dump room and closeness to a main highway; such a development would be the most economical.

Value of No. 1 White Lily Lode - - \$ 700

Value of No. 2 White Lily lode - - 1800

Total Value - - \$ 2500

Value of a 1/5 interest, \$500, allotted to each of the lode locations of this group.
