SURVEY NO. 4670

This survey was made with a Swiss Kern Theodolite, Model DKM1, No. 77769, having horizontal and vertical circles, 50 mm in diam. The circles are graduated in degrees and 20-minute increments. An optical micrometer, adjustable to the vertical and horizontal circles, permits the reading of angles, direct to 10 seconds accuracy and estimating to one-second accuracy. The instrument was in good condition at the time of the survey, and all adjustments were in good order.

All azimuths in this record were determined by the method of horizontal-angles-right referred to the meridian established by direct observation on the sun. At 4:03:30 p. m. on April 24, 1968, at Cor. No. 1 of the Mountain View No. 1 Lode, latitude $34^{\circ} 12' 15''$ N., longitude $112^{\circ} 50' 54.5''$ W., turning from a reference point about 600 ft. southerly, clockwise to the sun in a westerly direction.

True bearing of reference point S. $0^{\circ} 01'$ E.

The lines were measured with a Lufkin steel tape, 300 ft. in length, graduated every foot for 299 ft. and the remaining foot graduated to tenths and hundredths. One additional foot at the zero end is also graduated in tenths and hundredths. The tape was compared to a standard and found to be correct. All lines and connections of this survey were run by direct methods.

The magnetic declination observed at each corner of the survey gave a uniform value of $14^{\circ} 45'$ East.

MOUNTAIN VIEW NO. 1 LODE

At cor. No. 1 of the Mountain View No. 1 lode, on line 1-2 Mountain View No. 2 lode of this survey.

Set an iron post, $3/4$ ins. diam., 30 ins. long, in a 25 pound concrete and rock base, 15 ins. in the ground, with a brass cap, 2 ins. diam., firmly secured to the iron post, mkd. M. S. 4670 M. V. 1 1X; from which

The Cor. of Secs. 14, 15, 22 & 23, T. 10 N., R. 6 W., G. & S. R. B. & M., bears N. $0^{\circ} 01'$ W., 258.17 ft. dist. A stone 6 x 12 ins., 10 ins. above ground, firmly set, marked and witnessed as described in the official record.

This improvement was constructed for the development of the five lodes of this survey which are all contiguous lode claims owned in common within the range of benefit of said shaft.

The surface rises rapidly at the west end of the Mountain View Nos. 1 and 2 and the Home Stake lodes consequently levels driven from this improvement would be the most practical and economical means of developing each of the lodes of this survey.

Five hundred dollars or over has been expended in this improvement in such a manner as tends to the development of each lode of this survey subsequent to its location and to the time since which common ownership and contiguity have prevailed; therefore an undivided one-fifth interest in its value is hereby credited to each of the said lodes of this survey.

No portion of or interest in this improvement has been credited heretofore as patent expenditure to any lode claim.

OTHER IMPROVEMENTS

An unimproved dirt road traversing the Mountain View Nos. 1 and 2 and Home Stake lodes.
