FEET

This survey was made with a Swiss Kern theodolite, Model DKM 1, No. 77769, having horizontal and vertical circles, 50 mm. in diam. The circles are graduated in degrees and 20-minute increments. An optical micrometer, adjustable to the vertical and horizontal circles, permits the reading of angles direct to 10-second accuracy and estimating to one-second accuracy. The instrument was in good condition at the time of the survey and all adjustments were in good order.

All azimuths in this record were determined by the method of horizontal-angles-right referred to the meridian determined by the following observation:

April 6, 1978 at Cor. No. 1 of the Santa Rita #16 lode, latitude $31^{\circ}49'49''$ N., longitude $110^{\circ}45'12''$ W., elevation 5,115 ft. above sea level, and temperature 75° F. ,make a series of six altitude observations on the sun for azimuth at approximately equal time intervals, three each with the telescope in direct and reversed positions, observing opposite limbs of the sun, and reading the horizontal angle from a reference point about 600 ft. southeastward SW. to the sun.

Mean time of observation,
105th meridian standard
time = $4^{\text{h}}19^{\text{m}}44^{\text{s}}$ p.m.

Declination of sun at mean
time of observation = $6^{\circ}36'17.6''$ N.

Mean observed vertical
angle to sun's center = $25^{\circ}29'50''$

Mean horizontal angle from
reference point to sun's
center = $140^{\circ}25'05''$

True bearing to reference
point = $S.58^{\circ}48'E.$

The lines were measured with a Lufkin steel tape, 300 ft. in length, graduated every foot for 299 ft. and the remaining foot graduated to tenths and hundredths; the tape was compared to an Invar standard tape at the beginning of the survey and found to be correct.

All lines and connections of this survey were run by direct methods.

The magnetic declination observed at each corner of the survey gave a uniform value of $13^{\circ}30'E.$

CERTIFICATE OF SURVEYOR

Name of Mineral Surveyor Harvey W. Smith	Date Sept. 1, 1978
---	-----------------------

I HEREBY CERTIFY That in pursuance of an order received from the Chief, Branch of Cadastral Survey, Bureau of Land Management, at Phoenix, Arizona, dated Mar. 28, 1972 and May 2, 1977, I have carefully executed the survey of the claim of Anamax Mining Company known as the (lode, placer, or mill site) (See back of page) lodes, situated in Pima County, Secs. 25, 30, 31 and 36, Township 18 South Range 15 & 16 East, G. & S. R. Meridian, in the State of Arizona.

This survey, designated as number 4718, has been executed by me and under my direction and has been made in strict conformity with said order, the Manual of Instructions for the Survey of Public Lands of the United States, and in specific manner described in the foregoing field notes.

I FURTHER CERTIFY That the labor expended and improvements made upon and for the benefit of the (lode or placer) lode location(s) embraced in the said mining claim by claimant(s) or their grantors are fully stated in my report. The character, extent, location, and itemized value are specified in full detail. No portion of, or interest in, said labor and improvements so credited to this claim has been included in the estimate of expenditures upon any other claim.
