FEET

This survey was made with a Kern theodolite, Model DKM-2AE Ser. No. 145997, having automatic vertical indexing and microscopic angle reading capabilities enabling the instrument man to read angles, either horizontal or vertical, to 1 sec. of arc. This instrument was used in conjunction with electronic distance-measuring equipment, i.e., a Hewlett-Packard Model 3800 Distance Meter, Ser. No. 0987 A 00472, having a range of 10,000 feet and an absolute accuracy of 0.01 feet plus the distance measured divided by 100,000 when operated in normal temperature ranges. Also available for use by the instrument man was a W. & L. E. Gurley transit, Ser. No. 57289, equipped with horizontal limb $6\frac{1}{2}$ ins. diam., having two double opposite verniers, and a full vertical circle 5 ins. diam., having one double vernier; the horizontal verniers read to 3 secs. of arc; the vertical vernier reads to one minute of arc. This instrument was used for short-distance taping and alignment procedures and for topographic detail where great distances were not involved.

All bearings in this record were determined by the method of deflection angles referred to the meridian determined by the following solar observation:

July 24, 1973, at Cor. No. 1 of the J-46 lode in latitude $33^{\circ} 43' 31''$ N., and longitude $110^{\circ} 34' 12''$ W., as determined by scaling from U.S.G.S. quadrangle CHRYSOTILE, dated 1966, I make a series of six altitude observations upon the sun for azimuth at approximately equal time intervals, three each with the theodolite telescope in direct and reversed positions, observing opposite limbs of the sun, and reading the horizontal angles from a reference point approximately 1200 feet northwesterly clockwise to the sun.

Mean time of observation, 105th
meridian, standard time = 8:54 a.m.

Declination of sun at mean
time of observation = $19^{\circ} 48' 29''$ N.

Mean observed vertical angle
to sun's center, corrected
for refraction and parallax = $40^{\circ} 43' 09''$

Mean horizontal angle from
reference point to sun's center,
turned clockwise and to the
right to sun's center = $116^{\circ} 35' 35''$

True bearing to
reference point = N. $24^{\circ} 28' 22''$ W.

FEET

The lines were measured with either a Lufkin steel tape or with the aforementioned electronic distance meter. The tape was 500 feet in length, graduated every foot for 500 feet, with an added foot on the zero end, graduated in tenths and hundredths; the tape was compared with a standard 100.00 foot tape at the time of the beginning of the survey and found to be correct. The distance meter was compared with a taped course, 1200.00 feet in length, measured as a base-line with a standard 100.00 foot tape, and found to be precise and accurate.

All lines and connections of this survey were run by direct methods.

The magnetic declination observed at each corner of the survey gave a uniform value of 14° E.

Note concerning monumentation: Every corner of this survey was monumented with iron posts and brass caps. Each iron post consists of a 3/4-inch nominal inside diam. galvanized water pipe having a 1 ins. diam. exterior diam.; each pipe was placed in the ground in a foundation consisting of not less than 1/2 cu. ft. of high early-strength portland cement concrete, mixed at the site; lower end of pipe was deformed to preclude removal from concrete base. A brass cap, having a disc surface 2 ins. diam. and a stem 2 1/2 ins. in length, was securely cemented into the top of each pipe. and was mkd. as described, using 1/8-in. steel dies for lettering and numbering. Alongside every corner monument so set I caused to have erected a rock monument having a base 2 1/2 ft. minimum diam. and a height not less than two feet.

SURVEY NO. 4740 A

J-1 Lode

At Cor. No. 1 of the J-1 lode, identical with Cor. No. 4 of the J-46 lode of this survey.

Set an iron post, 2 ft. long, 1 ins. diam., 15 ins. into the ground, with brass cap mkd. J-1-1-4740A and J-46-4-4740A; from which

The U.S. General Land Office monument marking the 17-mile post on the west boundary of the White Mountain Indian Reservation, (now the San Carlos Indian Reservation) bears N. 81° 27' 56" E., 14392.70 ft. dist.;

AREAS

	acres
Total area, J-1 lode	20.606
Total area, J-44 lode	20.489
Total area, J-46 lode	20.448
Total area, J-51 lode	20.448
Total area, J-52 lode	20.654
Total area, J-53 lode	20.606
Total area, J-56 lode	20.644
Total area, J-57 lode	20.644
Total area, J-58 lode	20.644
Total area, Chrysotile mill site	4.948
Total area, VICTORY mill site	4.997
Total area, ELDORADO mill site	4.818

FEET	LOCATION
	<p>This survey is located in Unsurveyed Sections 1, 2,, and 4, Township 4 North, Range 17 East, and in Unsurveyed Sections 33 and 34, Township 4½ North, Range 17 East, of the Gila and Salt River Meridian, McMillan Mining District, Gila County, Arizona.</p> <p>The survey of the J-1, J-44, J-46, J-51, J-53, J-56, J-57, and J-58 lodes and the Chrysotile, VICTORY, and ELDORADO mill sites is identical with the respective locations as marked on the ground.</p>
	EXPENDITURES
No. 1	<p>The discovery point of the J-1 lode is on the lode line, 170 ft. from a point on line 4-1, 298 feet from Cor. No. 4. Value, none.</p>
No. 2	<p>A tunnel 5 x 7 ft. in size, the portal of which bears N. 54° 30' W., 355 ft. from Cor. No. 1 J-1 lode, and runs WEST, 20 ft. to Pt. A, thence WEST, 33 ft. to Pt. B, thence S. 12° W., 10 ft., thence S. 32° W., 30 ft. to breast. At Pt. A a drift, 5 x 7 ft. in size, runs N. 27° W., 25 ft., thence S. 84° W., 22 ft., thence N. 13° W., 12 ft. to breast. At Pt. b, a drift 5 x 7 ft. in size runs N. 20° W., 17 ft., thence S. 78° W., 15 ft. to breast at date of survey. Value, \$4000.</p>
No. 1	<p>The discovery point of the J-44 lode is on the lode line, 20 ft. from a point on line 4-1, 299.50 ft. from Cor. No. 4. Value, none.</p>
No. 2	<p>A cut 12 ft. wide, the face of which bears S. 51° W., 242 ft. from Cor. No. 1 J-44 lode; runs N. 20° W., 31 ft., to 12 ft. face. Value, \$550.</p>
No. 1	<p>The discovery point of the J-46 lode is on the lode line, 150 ft. from a point on line 3-4, 298 ft. from Cor. No. 3. Value, none.</p>
No. 2	<p>An open pit, 240 ft. long and of varying width, having an average depth of 3 ft., with bounds as indicated on the plat, occupies the west central portion of the J-46 lode, having been excavated in front of the portals of the "Donato" workings. Value of open pit, \$20,500.</p>

FEET	
No. 1	<p>The discovery point of the J-51 lode is on the lode line, 30 ft. from a point on line 3-4, 299 ft. from Cor. No. 3. Value, none.</p>
No. 1	<p>The discovery point of the J-52 lode is on the lode line, 10 ft. from a point on line 3-4, 300 ft. from Cor. No. 3. Value, none.</p>
No. 1	<p>The discovery point of the J-53 lode is on the lode line, 450 feet from a point on line 1-2, 299 feet from Cor. No. 1. Value, none.</p>
No. 2	<p>A trench, the easterly end of which bears N. 78° 30' W., 503 feet from Cor. No. 1 J-53 lode; 10 ft. wide, and 9 ft. deep, running S. 75° W., 12 ft. Value, \$500.</p>
No. 1	<p>The discovery point of the J-56 lode is on the lode line, 10 ft. from a point on line 2-3, 300 ft. from Cor. No. 2. Value, none.</p>
No. 1	<p>The discovery point of the J-57 lode is on the lode line, 10 ft. from a point on line 3-4, 300 ft. from Cor. No. 3. Value, none.</p>
No. 1	<p>The discovery point of the J-58 lode is on the lode line 10 ft. from a point on line 2-3, 300 ft. from Cor. No. 2. Value, none.</p>
	<p>An interest in a common improvement described as follows:</p>
	<p>A network of underground passages, drifts, stopes, winzes, and tunnels, known as the "El Dorado workings" underlies portions of the J-57 and J-58 lodes as indicated on the plat; these are being extended southerly and westerly toward the J-56 and J-52 lodes, eventually to be connected to the so-called "Donato" workings, also as shown on the plat underlying portions of the J-46 lode. Owing to the complicated nature of these workings, no attempt is made herein to describe them, or to indicate on the plat every excavation made to date. The plat does, however, show most of the mined-out area and the primary tunnels to the extent they had been driven on August 1, 1973. Value of underground workings, \$760,000 Value of one-fourth interest, \$190,000</p>

FEET

This improvement is in course of construction for the development of the J-52, J-56, J-57, and J-58 lodes of this survey, all of which are contiguous lode claims owned in common within the range of benefit of the above-mentioned workings. Since the expenditure shown above has been executed in such a manner as tends to the development of each lode cited subsequent to its location and to the time since which common ownership and contiguity have prevailed; therefore an undivided one-fourth interest in its value is hereby credited to each of said lodes.

An interest in another common improvement described as follows:

The "Donato" workings occupy portions of the J-46 and J-51 lodes as shown on the plat, with tunnels planned to be extended northwesterly and northerly, eventually to be connected with the aforementioned "El Dorado" network of tunnels. Similarly, no attempt is hereby made to described them individually, it being considered sufficient to show their extent on the plat.

Value of underground workings, \$60,000
Value of one-half interest, \$30,000

This improvement is in course of construction for the development of the contiguous J-46 and J-51 lodes of this survey, and the expenditure shown is applicable to both lodes. The development has been made subsequent to the locations of these lodes and to the time since which common ownership and contiguity have prevailed; therefore an undivided one-half interest in its value is hereby credited to each lode.

OTHER CORNER DESCRIPTIONS AND SUPPLEMENTAL DATA

Sur. No. 3521 Asbestin No. 24 lode: Cor. No. 2 is a cedar post, 4 ins. x 4 ins., 4 ft. long, firmly set and marked as described in the official record of Sur. No. 3521. The bearings of lines 1-2 and 2-3 are shown as approved.

Sur. No. 3521 Asbestin No. 25 Lode: Cor. No. 2 is an iron post with a brass cap $3\frac{1}{2}$ ins. diam., firmly set and properly marked; Cor. No. 3 is identical with Cor. No. 2 Sur. No. 3521 Asbestin No. 24 lode, described above. Line 2-3 was found to be N. $24^{\circ} 28' 22''$ W., 1500.61 ft., instead of N. $24^{\circ} 31'$ W., 1499.2 ft., as approved. The bearings of lines 1-2 and 3-4 are shown as approved.

FEET

Sur. No. 3521 Asbestin No. 26 Lode: Cor. No. 3 is an iron post with brass cap $3\frac{1}{2}$ ins. diam., firmly set and properly marked; Cor. No. 4 is identical with Cor. No. 2 Sur. No. 3521 Asbestin No. 25 lode, described above. Line 3-4 was found to be N. $24^{\circ} 32' 24''$ W., 1501.08 ft., instead of N. $24^{\circ} 31' W.$, 1499.5 ft., as approved. The bearings of lines 2-3 and 4-1 are shown as approved.

CERTIFICATE OF SURVEYOR

Name of Mineral Surveyor Travis L. Gant	Date November 6, 1973
--------------------------------------------	--------------------------

I HEREBY CERTIFY That in pursuance of an order received from the Bureau of Land Management, at Phoenix, Arizona, dated May 18, 1973, I have carefully executed the survey of the claim of Jaquays Mining Corporation known as the (lode, placer, or mill site) * (See below) situated in Unsurveyed Sections 1, 2, 4, 33, and 34, Township 4 N. & 4 1/2 N. Range 17 E., 17 E., Gila & Salt River Meridian, in the State of Arizona

This survey, designated as number 4740 A&B, has been executed by me and under my direction and has been made in strict conformity with said order, the Manual of Instructions for the Survey of Public Lands of the United States, and in specific manner described in the foregoing field notes.

I FURTHER CERTIFY That the labor expended and improvements made upon and for the benefit of the (lode or placer) Lode and Mill Site location(s) embraced in the said mining claim by claimant(s) or its grantors are fully stated in my report. The character, extent, location, and itemized value are specified in full detail. No portion of, or interest in, said labor and improvements so credited to this claim has been included in the estimate of expenditures upon any other claim.

CERTIFICATE OF APPROVAL

Office Arizona State Office
Location Phoenix, Arizona
Date September 11, 1974

The foregoing field notes of mineral survey number 4740 A&B, in Sections 1, 2, 4, 33 & 34, Range 17 E., Gila and Salt River Meridian, in the State of Arizona, surveyed unsurveyed Township 4 N. & 4 1/2 N., executed by Travis L. Gant, Mineral Surveyor, under order dated May 18, 1973, having been critically examined and the necessary corrections made prior to their certification by the surveyor, the field notes and the survey therein described are hereby approved.

<i>Joe T. Fullini</i> (Authorized Signature)	State Director (Title)
-------------------------------------------------	---------------------------

CERTIFICATE OF TRANSCRIPT

I HEREBY CERTIFY That the foregoing transcript of field notes of the above-described mineral survey number is a true copy of the original field notes.
