FFFT

This survey was made with a Topcon total station, model CTS2B No. J10844, having horizontal circle 3.228 ins. diam., and vertical circle 2.756 ins. diam., the circles are graduated in degrees and minute increments. An optical micrometer, adjusted to the vertical and horizontal circles permit the reading of angles direct to 6 seconds and estimating to 1 second accuracy. The instrument was in good condition at the time of the survey, and all adjustments were in good order.

All azimuths in the record were determined by the method of horizontal-angles-right and referred to the meridian determined by the following observation:

July 6, 1987 at cor. No. 2 Payson No. 3 Millsite, in latitude 34° 11' 14.5" N., and longitude 111°19'48.1" W., elevation 4,760 ft. above sea level, and temperature 92° F., make a series of six altitude observations on the sun for azimuth at approximately equal time intervals, three each with the telescope in direct and reverse positions, observing opposite limbs of the sun, and reading the horizontal angle right from a reference point about 820 ft. northward NE. to the sun.

|  |                  |
|--|------------------|
| Mean time of observation,<br>105th meridian standard<br>time               | = 8:24 a.m.      |
| Declination of sun at mean<br>time of observation                          | = 22°42'11.5" N. |
| Mean observed vertical<br>angle to sun's center                            | =35°36'          |
| Mean horizontal angle from<br>reference point clockwise<br>to sun's center | = 60°49'10"      |
| True bearing to reference<br>point   | = N 24°09' E.    |

The tie lines and corner distances were measured with a Topcon total station Model GTS2B No. J10844, all other distances were measured with a Lufkin steel tape 200 ft. in length graduated in feet, tenths and hundredths, and a steel tape 8 ft. in length graduated in feet, tenths and hundredths; both tapes were compared with a Lufkin Ranger standardized tape at the time of beginning the survey and found correct.

| FEET   | <p>All lines and connections of this survey were run by direct methods.</p> <p>The magnetic declination observed at each corner of the survey gave a uniform value of 14°30' E.</p> |

CERTIFICATE OF SURVEYOR

Name of Mineral Surveyor

Date

O.T. SMITH

Feb. 25, 1988

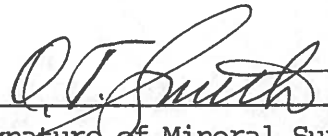

I HEREBY CERTIFY That in pursuance of an order received from the Arizona State Office, Bureau of Land Management, at Phoenix, Arizona, dated May 21, 1987, I have carefully executed the survey of the claim of Clay R. Thorne, known as the Payson Nos. 1, 2, and 3 millsites, situated in surveyed sections 21 and 28, Township 10 North, Range 10 East, Gila and Salt River Meridian, in the State of Arizona.

This survey, designated as number 4867, has been executed by me and under my direction and has been made in strict conformity with said order, the Manual of Instructions for the Survey of Public Lands of the United States, and in specific manner described in the foregoing field notes.

I FURTHER CERTIFY That the labor expended and improvements made upon and for the benefit of the Payson Nos. 1, 2, and 3 millsites embraced in the said mining claim by claimant(s) or its grantors are fully stated in my report. The character, extent, location, and itemized value are specified in full detail. No portion of, or interest in, said labor and improvements so credited to this claim has been included in the estimate of expenditures upon any other claim.

Globe, Arizona

(Location)

Title 18, U.S.C. section 1001, makes it a crime for any person knowingly and willfully to make to any department or agency of the United States any false, fictitious, or fraudulent statements or representations as to any matter within its jurisdiction.

## CERTIFICATE OF APPROVAL

Arizona State Office  
Phoenix, Arizona  
March 22, 1988

The foregoing field notes of mineral survey number 4867, in surveyed section 21 and 28, Township 10 North, Range 10 East, Gila and Salt River Meridian, in the State of Arizona, executed by O. T. Smith, Mineral Surveyor, under order dated May 21, 1987, having been critically examined and the necessary corrections made prior to their certification by the surveyor, the field notes and the survey therein described are hereby approved.

(Authorized Signature)

Chief Cadastral Surveyor of Arizona

(Title)

UNITED STATES DEPARTMENT OF THE INTERIOR  
BUREAU OF LAND MANAGEMENT  
ARIZONA STATE OFFICE

---

NOTICE OF CANCELLATION OF MINERAL SURVEY

The PAYSON NO. 1, PAYSON NO. 2 and PAYSON NO. 3 mill sites, Mineral Survey No. 4867, located in sections 21 and 28, Township 10 North, Range 10 East, Gila and Salt River Meridian, Arizona, are hereby cancelled.

These claims have not been filed with the Arizona State Office, Bureau of Land Management, in accordance with Section 314, 90 STAT. 2769 (43 U.S.C. 1744).

This cancellation was necessitated to clear the record.

The Mineral Survey Plat shall be noted as follows:

“PAYSON NO. 1, PAYSON NO. 2 and PAYSON NO. 3 mill sites, Mineral Survey No. 4867, were cancelled January 14, 2020, by memo 9605 (921) M.S. 4867, which is now a part of the original field notes.”
