Preliminary to commencing this survey I ran North on a blank line on the East boundary of Sec 36 and at 40.01 chs found the $\frac{1}{4}$ sec cor. and at 80.03 chs found the sec cor. I also ran West on a blank line on the South boundary of Sec 36 and at 39.97 chs found the $\frac{1}{4}$ sec cor. and at 80 chs found the sec cor. My compass will therefore run the same line as the exterior boundaries, and the chaining practically agrees.

Survey commenced Dec 29th 1887. with a Buato improved solar compass with telescope attachment.

I commenced at the cor to Sec 36

General Description

This Township is level. The
soil is rich and the ground is
more or less densely covered
with sage brush, greasewood
and scrub mesquite. In
places the brush is almost

Subdivisions T. 6 S. R. 7 E. continued

impenetrable. There is but one habitation in the Township that of Señor Araglio in the SE $\frac{1}{4}$ of Sec 31. With the exception of the well on his ranch there is no developed water in the township. The Santa Cruz river passes through the Twp. underground. Only during the wet season water spreads over the surface of the State flowing north-westerly.
