Subdivision D & R C E

Chain

Preliminary to commencing this survey I ran West on a blank line on the south boundary of Sec 36 and at 29.98 chs found the $\frac{1}{4}$ Sec cor. and at 80 chs found the Sec cor. I also ran North on the East boundary of Sec 36 and at 40 chs found the Sec $\frac{1}{4}$ Sec cor. and at 80 chs found the Sec cor. My compass will therefore run the same line as the Exterior boundaries and the chaining practically agrees.

Survey commenced Jan 10th 1888

At 12 o'clock M. to day I found latitude to be $32^{\circ}42'$ N. and my compass in good adjustment

General Description:

There is no habitation in this township and no traveled road running through it.

3 The surface is covered with a more or less dense growth of sage brush, greasewood, scrub mesquit and cactus in places.

7 There is considerable quoyella & black gramma grass in the Eastern and Central portion affording good range for a large number of Indian ponies and some cattle.

4 There is no developed water in the Twp but judging from the wells in the Indian town of Tuzayata just W of the N.E. Cor. abundant water
