## General Description.

The N. border of the township is in the Santa Cruz bottom of which the soil is very rich, producing heavy grasses and whatever crops are planted. On this part there is some timber & brush.

There is no running water at this season, but it is obtainable in wells.

The remainder of the township is mostly good for grazing purposes. There are some scattering trees and brush.

The soil is mostly 2<sup>d</sup> rate, but in the S.E. part is good.
