General Description

The greater portion of this Township
 contains mineral and is covered
 by the rough foothills of the Sta
 Rita mountains.

The South center of Township is
 covered by a mass of granite
 hills rough and precipitous and
 not known to contain any
 mineral. There is no agricultural
 land in the Township, the soil
 being totally worthless and very

Chambers

rocky. The Hacienda of Salero is in Sec 22 and is one of the oldest Mining villages in Arizona. It has been for some years past virtually abandoned most of the buildings being in ruins. Mr. Wise lives in one of the houses and is engaged in stock raising. There is a post office here for the accommodation of the neighbouring cattle-men and miners. Charles Wright has a house in NE $\frac{1}{4}$ of S. 14 and is engaged in mining. The Helvetia mining camp at present unoccupied and consisting of 2 frame buildings is in NW $\frac{1}{4}$ of Sec 11. Philip Arment has a house in SW $\frac{1}{4}$ of Sec 23 and is engaged in stock raising.

Subdivisions T-21 S. R 14 E - Continued

The old Salero house is in NW $\frac{1}{4}$ Sec 23 and is also engaged in stock raising.

Wardwells quartz mill is in SE $\frac{1}{4}$ of Sec 23 but it is now lying idle.

There are several other houses in the Township but most of them are unoccupied and in ruin. In the NE $\frac{1}{4}$ Sec 25 there is a house known as the Cranz Brothers house at present occupied by George Clark who is engaged in mining.

The famous Salero Hill and mine are located in Sec 24.

At the present time very little work is being done on the mines embraced in this Township. The San Cayetano mountains cover a small

Subdivision P. 21 S. R. 14 E - continued

portion of the extreme S.W. cor of the Township. The timber consists of Live oak juniper and cedar.

The township is fairly watered, water which is permanent Josephine Cañon flowing through the Township from N.E. to S.W. has water running in it for about 6 months of the year and some of the smaller washes have water flowing for several weeks after the rainy season when they become dry and water can only be obtained from deep holes or wells.
