General Description

The greater portion of this township
is in the Colorado River bottom
and it has a very rich produc-
tive soil, it is covered almost
everywhere with brush, consist-

Township 1 N. Range 1 W. of

ing of willow cottonwood
mesquite and arrow-weed,
sage brush and occasional
patches of wild hemp. There
is very little grass as the
bottom is subject to annual
overflow. There is a small pond
of water in Sec. 29, and also
in Sec. 32, and also Sec. 8. The
Colorado River flows through
Secs. 6, 7, and 18. The road
from Ehrenberg to the Colorado
River Ind. Agency passes through
the Eastern portion of the township.
In the S. E. corner is a high
gravelly mesa very much cut
up by washes, and extending
back to a low range of mountains
along the Eastern boundary of
the Reservation. No indications

The Colorado River Meridian.

of mineral were found. All stone except what were used in the S.E. corner for corners had to be hauled.

BOOK 1014

U. S. Surveyor General's Office,

TUCSON, ARIZONA, May 12 1876.

The foregoing Field Notes of the Survey of the

*Subdivision Lines of
Township 1 North,
Range 1 West.*

Colorado

(Of the ~~Gila and Salt~~ River Base and Meridian, Arizona, executed by *Chandler Robbins*

Deputy Surveyor, under his contract of the 26th day of May, 1875, having been

critically examined and the necessary corrections and explanations made, the said Field Notes and the surveys they describe are hereby approved.

John Masson
Surveyor General.
