## General Description.

This fractional township is level; valley and river bottom. The soil is generally a rich loam. Timber, where not cultivated; mesquite, turned cottonwood, willow, and arrow-wood; generally very dense. This fract. Tp. is well watered, being adjacent the Colorado River. There were settlers each in secs. 12, 13, and 23. A part of the township has been located by Desert Land Claimants. A plant for pumping water for irrigation is located on the east bank of large Estero in sec. 12.
