Township 8 S. Range 15 W.
Gila and Salt River Meridian
No. General Description

This township lies along the valley of the Gila, and contains much good land that can be irrigated from the river.

The extreme eastern and north-eastern part of the township is occupied by a rocky mountain range. Over this portion I did not extend lines, the land being barren and worthless. - In section 4, in the N.W. quarter is Mohawk Station, on the Overland stage line. There is some timber along the river, but little or none in the other portions of the township.
