I carefully examined the adjustments of my solar compass to-day, particularly the latitude and reversing apparatus, and found them correct.

January 17th 1853.

Before proceeding further with the exteriors of this T^p.
I made a change of 6 minutes in the latitude arc
of my solar compass by adding same to
the reading previously given, and at noon verified and
corrected same by observation on the sun. I also fur-
ther tested instrument by reversing.

I took the latitude and found it to be $34^{\circ} 11'$ North
from the Circle $20^{\circ} 9'$ & $10'$ N. Rd 20 & 21 E
