Survey made with Burt's Patent
Improved Solar Compass, newly used
and in first rate order. Made by
Otto Foumel, of Cassel, Germany.
Before proceeding with the retracings
of these exterior, I made a change of
15 minutes in the latitude arc of my
solar compass, by subtracting same
from the reading previously given
and at noon, verified ^{and} corrected
same, by observation on the sun. I
took the latitude ^{and} found it to be $34^{\circ} 58'$.
