General Description of Township
No. 16 North, Range 9 West of the
Navajo Special Meridian.

The quality of the land
in this Township is
good average land,
mostly covered with cedar,
Pinon and some Yellow
Pine, generally 3 $\frac{1}{4}$ rate.

There is a small stream of
water in the North Eastern
portion of the Township,
along which are some
very fine farms, but owing
to the scarcity of water in
certain seasons of the year,
it is not much cultivated.

The whole Township
is well adapted to grazing
purposes.

Completed August, 28th 1889.

Measuring chain compared
with standard and found
 $\frac{1}{8}$ inch long, carefully
adjusted thereto.

This Township is generally
high land mostly covered
with scattering cedar and
Pinon, 3 $\frac{1}{4}$ rate.

Soil generally 2 $\frac{1}{4}$ rate.
It is well adapted to farming
and grazing purposes.

There are no springs or
water courses in the Town-
ships, except such as dry up during
the hot season.

There are a few Indians
living in this Township, raising
corn and vegetables.

Completed October, 3 $\frac{1}{4}$ 1869.

General Description of Town-
 ship No. 2, North, Range No. 10,
 West of the Navajo Special
 meridian.

This Township is mostly
 prairie, there being very
 little timber in the Town
 and that 3rd rate cedar.

The "Rio Puerco" takes its
 rise in this Township and
 is about 4 chains wide, where
 it leaves the Township,

There is a fine spring in
 Section 35, slightly tinged
 with sulphur.

There are small springs
 all along the foot of the bluff.

Township No. 3. North Range
No. 10. West of the Navajo Special
Meridian.

This Township is generally rolling
upland, thinly covered in the
Eastern portion, with cedar and
Pinon, 3^d rate.

The "Rio Puerco" runs through
the middle of the Township,
having an average width of
three chains.

The valley land is nearly all
1st rate. On Sec's 4, 5, 8 & 9,
there is an Indian village,
the inhabitants of which have
large fields of corn and pumpkins,
in the surrounding country.

The upland is well adapted to
grazing purposes, and generally
2^d rate.

Measuring chain compared
with Standard, found $\frac{1}{4}$ inch
long, and carefully adjusted
thereto.

General Description of Township
No. 4 North, Range 10 West of
the Navajo Special Meridian.

The Eastern portion of this
Township is broken, sparsely
covered with Cedar and Pinon
3^d rate; but is well adapted
to grazing purposes.

The valley of the "Puerco" is
fine, 1st rate land, well adapted
to Agricultural purposes.

The average width of the "Rio
Puerco", is about 3 chains.
Low banks, sandy bottom
and gentle current.

Completed September 24th 1889.

Measuring Chain compared
with Standard, found $\frac{3}{8}$ inch
long, and adjusted thereto.

General Description of Township
No. 5. North, Range No. 10.
West the Navajo Special
Meridian.

The land in the Eastern portion
of this Township is broken
upland, cut up by a few
rocky cañons, soil 3^d rate.

The valley of the "Rio Puerco"
and "Rio Delchille", is level,
soil 1st rate. It is well
adapted to farming and is being
extensively cultivated by the
Indians, who have quite a
town near the junction of
these two rivers. "Canon De
Chille" is the largest cañon
on the Reservation, its depth
being, near the Eastern

Boundary of this Township,
not far from 1000 feet, and
is almost inaccessible except
by the way of its mouth.

The uplands are well
adapted to grazing. There
are a few scattering
Pinon and cedar trees
in the Eastern portion of
this township.

well adapted to grazing purposes. Soil generally 2nd rate.

In the western portion of the Township the land is quite good, and is well cultivated by the Navajoes.

In secs. 7 and 8, there is a field of corn of 150 acres.

In the same field pumpkins, melons &c, were seen in abundance.

There is very little timber in the Township; what there is, consisting of cedar and Pinon, 3rd rate, lies in the south west corner of the Township.

Completed November, 15th 1889.

Measuring chain compared with Standard, found $\frac{1}{4}$ inch long and carefully adjusted thereto.

General Description of Town
ship No. 8 North, Range 10 West
of the Navajo Special Meridian.

The land in this Township
is mostly prairie.

About one half is broken
and stony, but well adapted
to grazing purposes.

The valleys along the "De
Chille" and other streams,
emptying into it, are well
adapted to farming purposes.

The "Rio De Chille"
passes through the western
Tier of Sections, taking a
nearly due North course.

In dry seasons, its waters
sink in the sand.

The average width of this
stream is about four chains.

Low banks and sandy
bottom. In the wet
season its waters are very
muddy.

General Description of **BOOK** 1953
Township No. 9. North, Range
10 west of the Navajo Special
Meridian.

This Township is very
nearly all prairie, generally 2^d
rate, except along the valley of
the "De Chille" where it is
1st rate farming land.

There is a very fine spring
in Section 28. but its waters
do not flow far, but sink in
the sand.

There are a few cottonwood
trees in Sections 30 and 31.

The "Rio Carrissa" passes
through the North Eastern
portion of the Township,
having a North West course.

The "Mesa Ventana" is a
bluff about 500 feet in
height, with sides almost
perpendicular, of red sand
stone formation.

Measuring chain compared
with Standard and found
correct.

General Description of
Township No. 10, North, Range
No. 10 West of the Navajo
Special Meridian

This Township is all prairie,
generally rolling. 2nd rate
upland, well adapted to
grazing purposes.

The bottoms are level, having
a 1st rate soil, well adapted to
agricultural pursuits.

There is no living stream
in the Township in dry
seasons.

Completed November 27th
1869.

We hereby certify that we as-
sisted E. N. Darling, U.S.
Surveyor, in subdividing
Township No. 1. North, Range
9, and Townships No. 1, 2,
3, 4, 5, 6, 7, 8, 9, & 10 North,
Range No. 10 west of the
Navajo Special Meridian, and
that said Townships have
been, in all respects, to the
best of our knowledge and
belief, well and faithfully
surveyed, and the boundary
monuments planted ac-
cording to the instructions
furnished by the Commissioner
of the General Land Office.
