---

### General Description

With the exception of portions of Secs. 28 & 29, nearly all the soil in this fractional township can be classed as 2<sup>nd</sup> Rate. With water the land could all be cultivated.

The Eastern half of this township has a gentle slope to the East, while the Western portion slopes to the North and West, and in places

land is rolling. With few exceptions the dry sand washes mentioned are mostly even with the ground and more in the nature of deposits.

The fractional township is covered with Mesquite and Palo Verde brush, with scattering Mesquite and Palo Verde trees throughout. There are no settlers, or improvements of any kind in this township.

I. D. Chilson

U. S. Depy, Surveyor

U. S. Surveyor-General's Office,

TUCSON, A. T. July 11<sup>d</sup> 1888

The foregoing Field Notes of the Surveys of  
Subdivision T 16 R 12  
E in Papago Indian  
Reservation

Gila and Salt River Meridian  
in Arizona Terr. executed by  
L D Clifton

U. S. Deputy Surveyor, under his contract dated  
November 30<sup>d</sup> 1887,  
having been critically examined, the necessary correc-  
tions and explanations made, the said Field Notes and  
the surveys they describe are hereby approved.

John Hise  
U. S. Surveyor-General  
for the Territory of Arizona.
