FIELD NOTES

OF THE SURVEY OF THE

Subdivision Lines of Township
No 26 North, Range No 17 East

Of the Gila and Salt River Base and Meridian,

in the Territory of Arizona

EXECUTED
AS SURVEYED BY

Sidney C. Stout

Examiner of Surveys
United States Deputy Surveyor,

Special Instructions from the Commissioner of the General Land Office
Under ~~his Contract No.~~ dated October 2nd 1907 and May 15th 1908

Survey commenced September 8th, 1908

Survey completed September 15th, 1908

PRELIMINARY OATHS OF ASSISTANTS.
(see Subdivisional Book "A")

WE, _____ and _____
do solemnly swear that we will well and faithfully execute the duties of chainmen; that we will level the chain upon even and uneven ground, and plumb the tally pins, either by sticking or dropping the same; that we will report the true distances to all notable objects, and the true lengths of all lines that we assist in measuring, to the best of our skill and ability, and in accordance with instructions given us, in the survey of _____

_____, Chainman.

_____, Chainman.

Subscribed and sworn to before me this _____ }
day of _____, 190 }

WE, _____ and _____
do solemnly swear that we will well and truly perform the duties of moundmen in the establishment of corners, according to the instructions given us, to the best of our skill and ability, in the survey of _____

_____, Moundman.

_____, Moundman.

Subscribed and sworn to before me this _____ }
day of _____, 190 }

WE, _____ and _____
do solemnly swear that we will well and truly perform the duties of axmen in the establishment of corners and other duties, according to instructions given us, to the best of our skill and ability, in the survey of _____

_____, Axman.

_____, Axman.

Subscribed and sworn to before me this _____ }
day of _____, 190 }

I, _____, do solemnly swear that I will well and truly perform the duties of flagman according to instructions given me, to the best of my skill and ability, in the survey of _____

_____, Flagman.

Subscribed and sworn to before me this _____ }
day of _____, 190 }

Chains

10

Sunny. Commenced September 8th 1908 and executed with a Young and Sons light mountain transit No. 10 with Smith's solar attachment. The horizontal limb is provided with two double verniers placed opposite to each other reading to single minutes of arc. which is also the least count of the verniers of the latitude and declination arcs.

Examine the adjustments of the transit and find the levels and line of collimation to be in perfect adjustment; then to test the solar apparatus by comparing its indications resulting from solar observations made during a.m. and p.m. hours with a meridian determined by observation on Polaris I proceed as follows;

At my Camp. which is located near the cor. of sec. 11. 12. 13 and 14 T. 26 N. R. 17 E. Latitude $35^{\circ}39'N$. Longitude $110^{\circ}39\frac{1}{2}'W.D.$ Set off $35^{\circ}39'N$. on the lat. arc. $5^{\circ}35\frac{1}{2}'N$. on the decl. arc. and at $4^h 28^m$ p.m. l.m.t. determine a meridian with the solar and mark a point thereof by a nail driven in a stake set in the ground 5 chs N. of my instrument.

At $8^h 20^m$ p.m. l.m.t. observe Polaris at Eastern elongation in accordance with instructions in the Manual. and mark the direction thus determined. by a nail driven in a stake set in the ground 5 chs N. of my instrument.

September 8th 1908

Sept 9th At $6^h 30^m$ a.m. ^{l.m.t.} lay off the azimuth of Polaris $1^{\circ}27'$ to the West. and mark the meridian thus determined by driving a nail in the stake set Sept 8th on which the meridian falls. 0.2 ins East of the point determined by the solar. At $6^h 58^m$ a.m. l.m.t. set off $35^{\circ}39'N$. on the lat. arc. $5^{\circ}22\frac{1}{2}'N$. on the decl. arc. and determine a meridian with the solar and mark a point thereof by a nail driven in the stake already set 5 chs N. of my instrument.

Subdivision of T₁ 26 N R 17 E

BOOK 2585

This point falls 0.1 ins east of the meridian determined by the Polar observation.

The solar apparatus by p.m. and a.m. observations defines positions for meridian and respectively about 0' 10" west. and 0' 05" east. of the meridian established by the Polar observation; therefore I conclude that the adjustments of the instrument are satisfactory.

I commenced at the Cor. of Secs 1, 2, 35 and 36, on the S. side of the T₁; ^{recently established by me & described in Exterior Book "G"}

Latitude $35^{\circ} 36' N$. Longitude $110^{\circ} 29.2' W$

At this Cor. I set off $35^{\circ} 36' N$ on the lat. arc. $5^{\circ} 20' N$ on the decl. arc. and at $8^h 18^m$ a.m. l.m.c. determined a meridian with the solar. Thence I run

$V 0^{\circ} 01' W$. Bet. Secs. 35 and 36.

Over rolling sandy land covered with sage and greasewood brush and bunch grass.

40.00 Set an iron post 3 ft long 1 in. in diam. 26 ins. in the ground for $\frac{1}{4}$ sec cor. marked on brass cap $\frac{1}{4}$ S 35 on W. half and S 36 on E. half.

Dig pits $18 \times 18 \times 12$ ins. N and S. of post. 3 ft. dist. and raise a mound of earth $3\frac{1}{2}$ ft. base, $1\frac{1}{2}$ ft. high W. of cor.

42.00 Top of sand ridge runs N.E. and S.W. descend gently

60.00 Center of depression runs N.W. and S.E. thence over rolling land.

80.00 Set an iron post 3 ft long 2 ins. in diam 24 ins. in the ground for cor. of Secs. 25, 26, 35 and 36. marked on brass cap T 26 N S 26 in N.W. R 17 E S 25 in N.E. S 36 in S.E. S 35 in S.W. grade up.

Dig pits $18 \times 18 \times 12$ ins. in each sec. $5\frac{1}{2}$ ft. dist. and raise a mound of earth 4 ft base, 2 ft. high W. of cor.

Land rolling and hilly.

Soil sandy 3rd rate.

No timber.

September 15th 1908

General Description.

The land in this township consists chiefly of
rolling sand hills, is highest in the southern
part, and slopes gently to the N.W.

The soil which can nearly all be classed
as 3rd rate is covered with a good growth
of nutritious grasses, which furnished
excellent pasture for numerous bands
of sheep and goats. Belonging to the Hopi
Indians.

There is some level land along the Polaced
Wash which crosses the north western
part of the township in a southwesterly
direction, this land is of a 2nd rate character
and will produce corn and short season
crops without irrigation.

There is no timber in the township and
no minerals or stone of commercial
value.

The Burro Spring in Sec. 7, furnished
the only water found in the township
during the dry summer months.

Chains

There are no permanent settlers in the township although at different seasons of the year. Indians who own bands of sheep occupy the buildings constructed for them in the vicinity of Burro Spring.

Sept. 15. 1908.

Sidney C. Blouk
U.S. Examiner of Surveys

BOOK 2585

U.S. EXAMINER OF SURVEYS
FINAL OATHS OF DEPUTY SURVEYOR AND HIS ASSISTANTS.

LIST OF NAMES.

A list of the names of the individuals employed by Sidney E. Blout
Examiner of Surveys
United States Deputy Surveyor to assist in running, measuring, and

marking the lines and corners described in the foregoing field notes of the survey of the subdivision lines
of Twp. 26 N. R. 17 E. of the Gila and Salt River Base and Meridian in the Territory of Arizona

- showing the respective capacities in which they acted:
- Fred. L. Warner and Vair L. White Harry Lake May Companions
Chainmen.
 - Ralph N. Westraud and Walter A. Swaffer Chainmen.
 - Henry Jennings Moundman.
 - Harry J. Stabler Moundman.
 - Charles A. Dutton Axman.
 - Robt. E. Claborn Flagman
Flagman.
 - Chas. L. Shumway Flagman.

FINAL OATH OF ASSISTANTS.

We hereby certify that we assisted Sidney E. Blout
Examiner of Surveys
United States Deputy Surveyor, in surveying all

those parts or portions of the Subdivision lines of
Township 26 North, Range 17 East

of the Gila and
Salt River Base and Meridian, Territory of Arizona, which are represented
in the foregoing field notes as having been surveyed by him and under his direction; and that said survey
has been in all respects, to the best of our knowledge and belief, well and faithfully surveyed, and the
corner monuments established according to the instructions furnished by the Commissioner of the
General Land Office.
