Survey commenced Nov.12, 1913, and executed jointly by Jesse B. Wright and William H. Elliott, U. S. Surveyors, Using Young & Son's light mountain transits Nos. 8145 and 8492, description and field tests heretofore given in books "D" and "E".
(Lines run by Wright and Elliott designated by J. B. W. and W. H. E., respectively.

Knowing from recent and repeated tests made on a true meridian established by observations of Polaris at our camp, that our instruments are in correct adjustment, we proceed as follows:- J. B. W.

At the cor. of secs. 1, 2, 35 and 36 on the N. bdry. of the Tp. recently re-established by William H. Elliott and by him described in book "A", I set off 17°37'S. on the decl. arc, and 32°51½'N. on the lat. arc, and determine a meridian with the solar.

General Description.

T.7 S., R.8 E., is in a gently undulating valley, nearly level, draining to the NW. The soil is alluvial, being underlaid in parts of the NW. portion with a stratum of caliche at a depth of from 12 ins. to 24 ins. The Tp. is covered with a good growth of mesquite and greasewood, but no timber of commercial value.

There are many settlers in the Tp. who have made permanent improvements, such as houses, well, pumps, corrals etc., and several who have recently moved in who are clearing there land. The settlers noted are:

R. H. Miller in sec. 4, T. Michael in sec. 6, Roy S. Ward in sec. 10, John A. Chantry and Laura B. Chantry in sec. 15, C. H. Himmel and W. H. McGinnis in sec. 18, M. D. Chantry in sec. 19, Mrs. A. J. Sandiforth in sec. 20, Wm. Burke and Wm. E. Chantry in sec. 22, W. T. Hutton in sec. 28, L. A. Hutton in sec. 29, Chas. Reynolds, Anna C. Davis and Ames Davis in sec. 30, Fred Powers and Nell K. White in sec. 31, Dan Gingirch in sec. 32, Viola Gingirch, Elmer R. Todd and A. J. Brandt in sec. 33 and Adolph Kurz in sec. 8.

Water for irrigation is found at a depth of from 50 ft. to 80 ft.

The roads shown will soon be changed to conform with the sec. lines.
