Survey executed with a Young & Son's light mountain transit No. 8586, described in Book "A."

From recent and repeated field tests, I know the transit and solar attachment to be in satisfactory adjustment,

From the old cor. of T. 11 S., R. 21 and 22 E., which is a lava rock, 16x12x10 ins., above ground, firmly set and marked with 6 notches on N., E. and W edges, and witnessed by mound of stone 3 ft. base, 2 ft. high, N. of cor.

Survey executed with a Young and Son's light mountain transit No. 8685, with Smith solar attachment, described in Book "A."

Apr. 17, 1915, at a point near camp, in sec. 23, T. 11 S., R. 21 E., at 11h. 48m. p.m., l.m.t., I observe Polaris at lower culmination in accordance with instructions in the Manual of Surveying.

Apr. 18. At 7h. 30m. a.m., l.m.t., I mark the meridian thus determined by a peg set firmly in the ground, 5 chs. N. of my station.

At 8h. a.m., l.m.t., I set off 32° 22' N. on the lat. arc; 10° 37' N. on the decl. arc; and determine a meridian with the solar. The meridian thus determined falls within 1' in azimuth of the meridian established by observations on Polaris.

At 4h. p.m., l.m.t., I set off 32° 22' N. on the lat. arc; 10° 44' N. on the decl. arc; and determine a meridian with the solar. The meridian thus determined falls within 1' in azimuth of the meridian established by observations on Polaris. I, therefore, conclude that the adjustments of the transit and solar attachment are satisfactory.

GENERAL DESCRIPTION

The portion of this township subdivided as described in the preceding field notes contains all of the land in the township which is of value for agricultural purposes. The land is mostly mountainous, the mountains being part of the Galiuro Range. The level and rolling land is situated in the northern part of the township along Ash Creek, and its tributary washes; in secs. 13 and 24, and in secs. 35 and 36.

The soil on the mountainous land is rocky, and that on the rolling and level land is gravelly and gravelly loam. The timber is scattering oak, pine and juniper. There is very little undergrowth. A fair growth of grass suitable for grazing covers the entire township. Ash Creek, and several of the other washes, carry a flow of clear cold water. A spring is located in sec. 14. Water is stored in a tank in sec. 35, known as "Whalen's Tank;" also in a tank in sec. 10. Bassett Canyon traverses secs. 29 and 32, course south. The settlers located are: Roy Morgan with house in sec. 2, Baker with house and fenced land in sec. 3, Dug Ware with house, tanks, and fenced and cultivated land in sec. 10, McPeters with house, and fenced and cultivated land in sec. 13, Crawford with house and corral in sec. 14, Ware with house, corral and fences on line between secs. 10 and 15, and Barrett with house in sec. 23.

There are no indications of mineral prospects in the Town-

Boundaries of Subdivided portion of T.11 S., R.21 E.
